IDENTIFIERS	*Oklahoma (Oklahoma City)

ABSTRACT

This report provides information on associate degree and certificate offerings at four two-year institutions in the Oklahoma and Tulsa City metropolitan areas and articulation between baccalaureate degree programs at the University of Central Oklahoma and four metropolitan area two-year institutions. Part I classifies Oklahoma City area lower-division programs in terms of student demand, compares market saturation for the Oklahoma City and Tulsa areas, and makes 21 recommendations for program improvement. Appendixes to this section provide tables of comparative data for the Oklahoma City and Tulsa metropolitan areas covering course offerings; full-time equivalent students; section size; total, direct, faculty, and unit costs; and section frequency. Part II describes a study of cooperative efforts among the five Oklahoma City metropolitan area public colleges and universities, highlighting findings related to the articulation and transfer of courses and programs, collaboration regarding programs, existing collaborative support activities, benefits to students from cooperative efforts, market saturation, and the cost of delivery of services. Appendixes to part II include information on general education courses; sample articulation agreements; headcount enrollment for fall 1988 to fall 1991 for programs by discipline area and institution; academic calendar comparisons for metropolitan area institutions; information on staff development activities; telecourse enrollment; enrollment as percent of the population; and a program review schedule. STUDY AND RECOMMENDATIONS

ON
LOWER-DIVISION OFFERINGS
IN THE
OKLAHOMA CITY METROPOLITAN AREA

BACKGROUND

In August 1993, the Oklahoma State Regents for Higher Education requested a study of lower-division course and program offerings in the Oklahoma City metropolitan area. Regents requested that the study include lower-division offerings from Rose State College, Redlands Community College, Oklahoma City Community College, Oklahoma State University Technical Branch, Oklahoma City, and the University of Central Oklahoma. While the focus is on course/program offerings by these five entities, the issues of cooperation, articulation, and transferability are also addressed. In analyzing course and program offerings in the Oklahoma City metropolitan area, the Regents asked that the Tulsa Junior College multi-campus model be used for comparative purposes and to identify possible program and curricular inefficiencies in the Oklahoma City metropolitan area.

The Oklahoma City Metro Study follows several related initiatives and activities of the State Regents. One goal in the "Program for Academic Excellence and Efficiency" calls for increased efficiency in delivery of services in metropolitan areas. Two State Regents' studies have suggested efficiencies for Oklahoma City. The 1993 Governance Study suggested combined governance of Oklahoma City Community College, Redlands Community College, and Oklahoma State University Technical Branch, Oklahoma City as one efficiency measure. The 1990 Parnell report reviewed Oklahoma City lower-division offerings and made 11 "Here and Now Recommendations," half of which have been at least partially implemented. The Metro Study is one aspect of the program duplication project, a top priority on the State Regents' 1994 workplan.

Studies of possible program duplication are not limited to the Oklahoma City lower-division providers. The 1994 effort also involves a study of graduate offerings by the University of Oklahoma and Oklahoma State University and the coordination/collaboration of Oklahoma City area aviation/aerospace programs (Aviation Appendix).

COMPONENTS OF STUDY

The study is a two-part document. The portion titled "Cooperative Efforts Among Metro Area Higher Education Institutions" is a joint product prepared by academic staffs of the five metro institutions and State Regents. The background, executive summary and recommendations at the front of the document were prepared by State Regents' staff. The two portions contain:

Executive Summary:

- Background
- Program Overview
- Review of Programs in the Three Groups
- Market Saturation for the Two Metro Areas, A Comparison
- Preliminary Observations
- Recommendations

Cooperative Efforts:

- Purpose of Study and Process
- Articulation and Transfer of Courses and Programs
- Programs Offered
- Existing Collaborative Support Activities
- Benefits to Students
- Market Saturation and Cost of Delivery of Services
- Utilization of Resources
- 21 Recommendations for Expanded Cooperative Efforts

METHODOLOGY

PROCESS. Since commencement of the study in August 1993, the Chancellor has met twice on this topic with Oklahoma City metro presidents to discuss the study parameters and progress. The academic staffs of the State Regents' office and metro institutions have met nine times as a group, and there have been numerous meetings of institutional staff. In general, staff have reviewed present operations and made significant recommendations for expanding the cooperative and collaborative effort that currently exists.

DATA. The program data for the study have been collected in the State Regents' Unitized Data System (UDS) and are a component of the Academic Planning/Resource Allocation (APRA) data system. Oklahoma public colleges and universities report to the State Regents on a semester basis unit information regarding students enrolled, courses offered, and degrees conferred as well as annual reports regarding expenditures. In addition, the State Regents' staff maintain the degree program inventory and the course inventory. These data and data structures form the matrix from which the analyses in this report flow. For the fall headcount enrollments and the degrees conferred information, the degree program inventory was matched with UDS student records to reflect the number enrolled or graduated from each existing degree program. The course reports required information from the course inventory, an additional data base from Tulsa Junior College (for the campus location information), UDS section record, course/section cost, and FTE information from the "program budgeting report." The course inventory, a complete listing of all approved courses, provides a code that accurately places a course in a specific discipline area. TJC provided section specific information as to where the section was offered; the UDS record data allowed a match between the course inventory and the program budgeting information; and the program budgeting information provided section specific cost, FTE production, section size, and number of courses and sections.

PROGRAM PLACEMENT. Placement of the metro programs into the four categories was agreed upon by institutional and State Regents' academic staffs.

LIMITATIONS/PARAMETERS. Data for 1991-92 was used to reflect student head count and FTE enrollment for this report, and it is possible that additional cooperative activities occurring since that time may have yielded positive results not apparent in the 1992 information. Data for 1992-93 is used in the course analyses. As course data is analyzed and the Oklahoma City offerings are compared to the Tulsa offerings, it should be noted that two historical practices have combined to produce some data inaccuracy. Essentially the way section numbers are recorded causes the number of some offerings (sections) to be underreported and class sizes to be reported larger than they actually are. This caution, however, is not to say that these analyses are not valuable. In broad global terms, they provide accurate pictures of the extent of the course work, the quantity of the course work, and, in a more relative fashion, differences between institutions in class sizes.

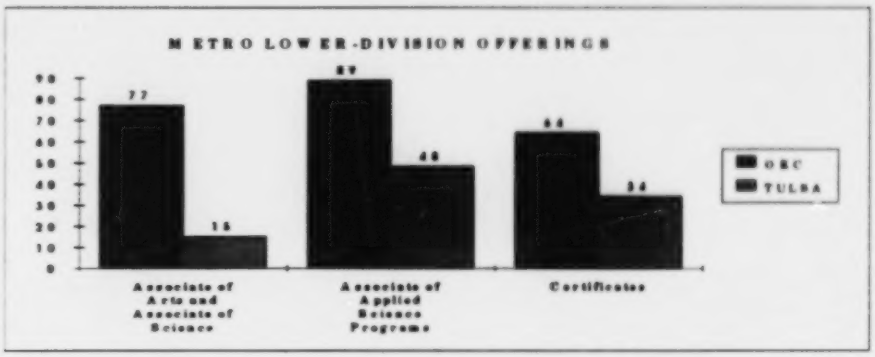
The study only examined the associate degree programs at the four Oklahoma City metropolitan two-year institutions/branch and the articulation between the baccalaureate degree programs at the University of Central Oklahoma with the lower-division work at the other metro institutions. Certificate programs were not included in the study.

The study does not address the following: governance; local funding; cooperation with area technical schools; the name of Oklahoma State University Technical Branch, Oklahoma City; or public service/noncredit offerings. The study also does not address offerings in the Oklahoma City metropolitan area from independent institutions or other public institutions (e.g., University of Oklahoma, Oklahoma State University, Langston University).

EXECUTIVE SUMMARY

PROGRAM OVERVIEW

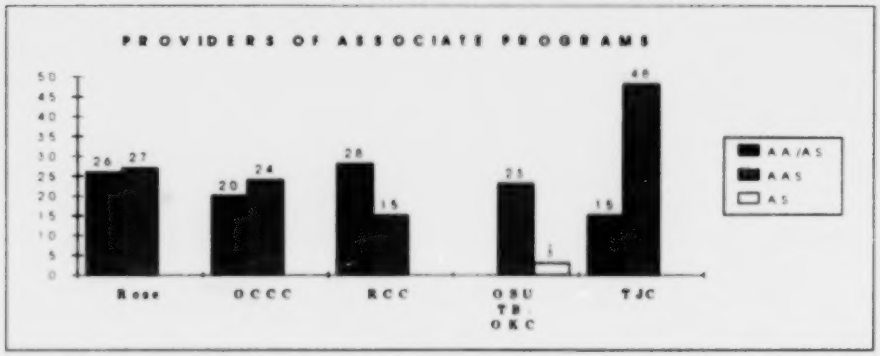
KINDS OF OFFERINGS. As of February 1994, the four two-year metro institutions/branch (Rose State College; Oklahoma State University Technical Branch, Oklahoma City; Redlands Community College; and Oklahoma City Community College) offered 230 associate degree and certificate programs. Tulsa Junior College and its four campuses served the Tulsa metropolitan area with 64 associate degree and 34 certificate programs.



METRO LOWER-DIVISION OFFERINGS

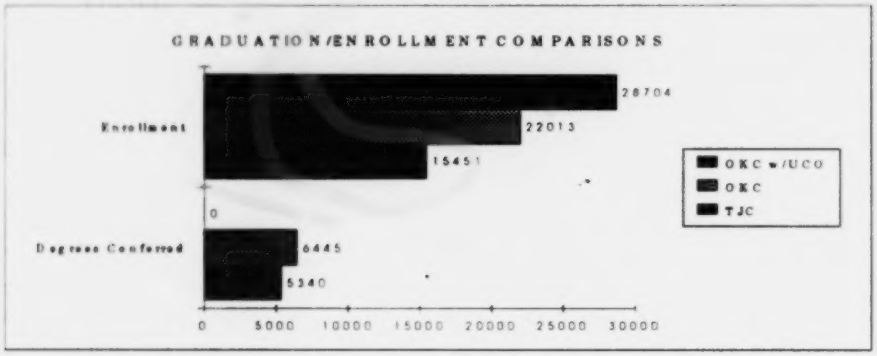
	OKC	TULSA
Associate of Arts and Associate of Science Programs	77	15
Associate of Applied Science Programs	89	48
Certificates	64	34
TOTAL	230	97

ASSOCIATE PROGRAM PROVIDERS. This study focused only on the associate degree program offerings. Associate degree offerings at the four metro campuses are indicated below along with associate degree offerings by Tulsa Junior College in the Tulsa metropolitan area.



It is important to note that many TJC programs, such as the 15 university parallel associate in arts and associate in science, are offered at more than one TJC campus. On the other hand, TJC offers many technical/occupational degrees at only one campus. In the Oklahoma City metro area, programs such as nursing, criminal justice, police science, and electronics are offered at several campuses.

PRODUCTIVITY. In the five year period from 1987-88 to 1991-92, the 166 Oklahoma City associate degree programs graduated 6,445 students. In the 1991 fall semester, 22,013 students were enrolled in these programs. If UCO's lower-division enrollment is included, the total lower-division headcount enrollment for fall 1991 would be 28,704. During the same period, TJC's 63 associate degree programs graduated 5,340 students and enrolled 15,451 students. Oklahoma City's greater population (approximately twice that of Tulsa's) must be taken into account when reviewing these figures.



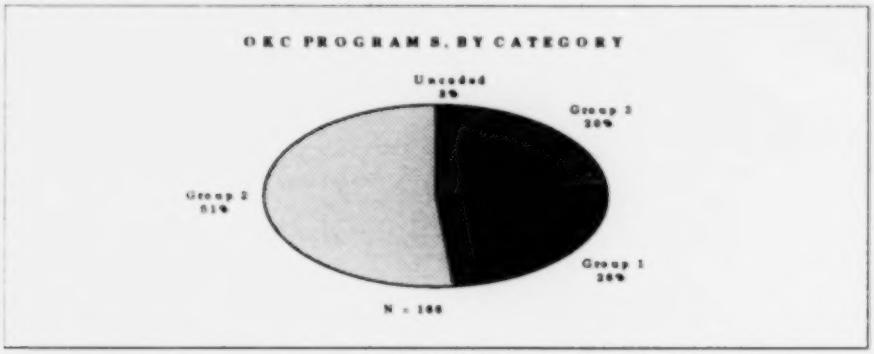
PROGRAM CATEGORIES. The working committee comprised of institutional and State Regents' academic staff reviewed the degree programs and classified them into three groups:

GROUP #1: Unique programs with insufficient student demand for more programs

GROUP #2: Programs within the metropolitan Oklahoma City area with adequate demand to support the programs

GROUP #3: Programs for which student demand indicates possibility for expanded cooperative scheduling or cooperative efforts among Oklahoma City area institutions

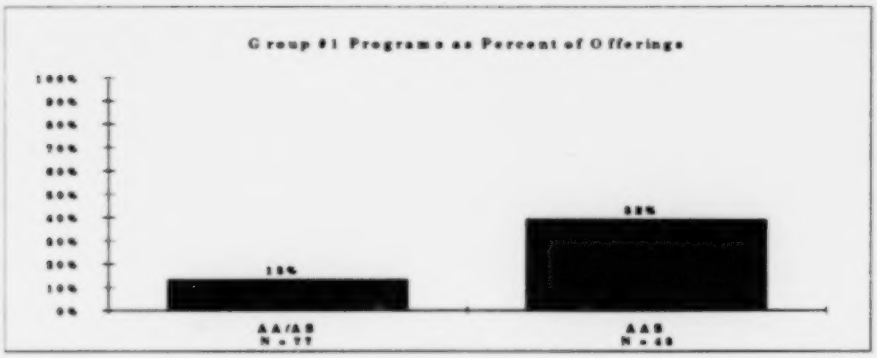
In summary, the 166 associate programs in Oklahoma City were grouped as follows:



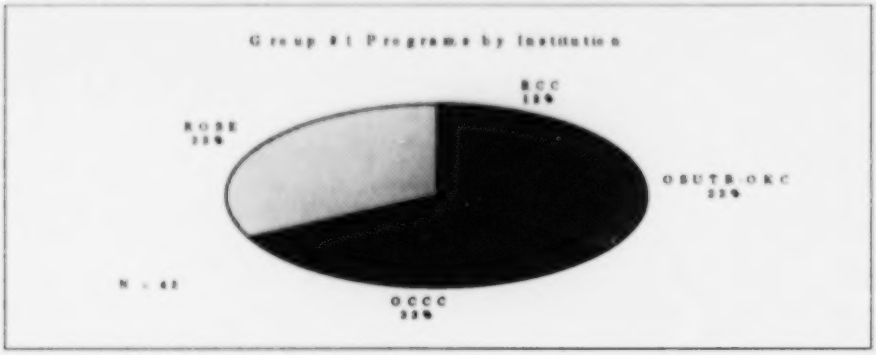
Programs in the above three categories, by institution, are described in the attachments to the Cooperative Efforts portion of this study and described in the following category reviews. Programs at UCO and TJC were not classified.

REVIEW OF GROUP #1 METRO PROGRAMS

A total of 43 (26 percent) of the 166 associate degree programs were placed in Group #1. Programs placed in this category represent 13 percent (10 programs) of the AA and AS degrees and 39 percent (33 programs) of the AAS degrees.



Of these 43 Group #1 programs, Rose offers 33 percent (14 programs), Redlands 12 percent (5 programs), OCCC 33 percent (14 programs), and OSUTB-OKC 23 percent (10 programs).



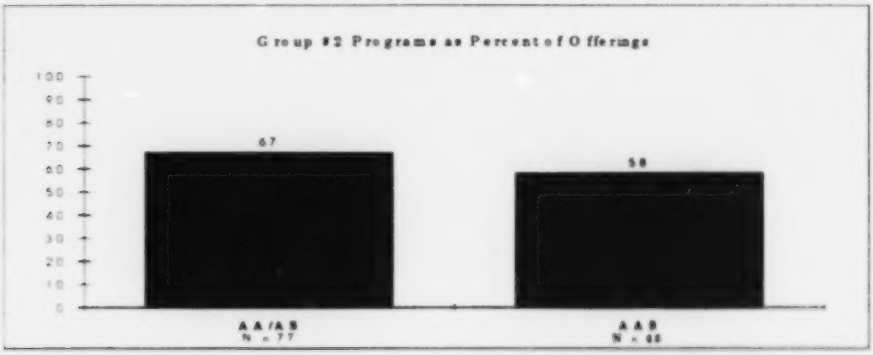
These 43 programs graduated 18 percent (1,175) of the Oklahoma City metro graduates over a five-year period and enrolled 18 percent (3,746) of the metro students in fall 1991. Of the 1,175 graduates, 50 percent came from Rose, 3 percent came from Redlands, 28 percent came from OCCC, and 19 percent came from OSUTB-OKC. Of the 3,746 students enrolled, 38 percent were at Rose, 3 percent were at Redlands, 39 percent were at OCCC, and 21 percent were at OSUTB-OKC.

With the exceptions of OCCC's associate degrees in Diversified Studies and Humanities, all of the degree programs in this group are job-related degree programs. The associate in applied science degree lends itself to a high degree of specialization because it has traditionally been regarded as a terminal degree, in that at completion the graduate is prepared to enter the workforce. Thus, these degrees are designed with specific employment outcomes in mind. A review of the health care programs illustrates the job-specificity of associate in applied science degrees in that 11 of 43 Group #1 programs

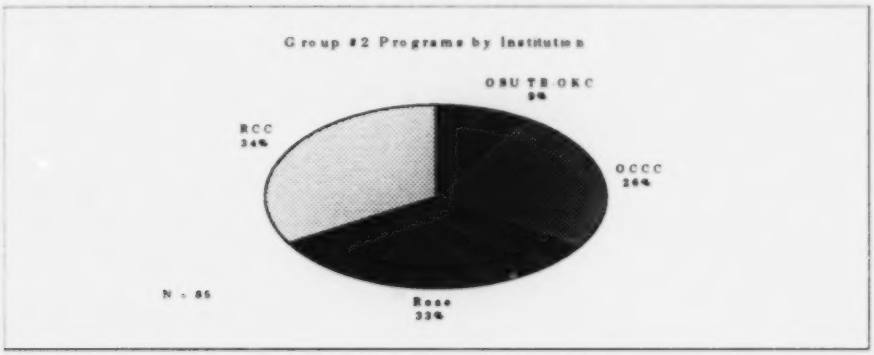
are in health-related fields and are not duplicated. Furthermore, these 11 programs represent 69 percent of the 16 health care AAS degree programs. The others, four AAS nursing programs and the medical lab technician program (duplicated at UCO at the baccalaureate level), are in Group #2--Duplicated with Justification.

REVIEW OF GROUP #2 METRO PROGRAMS

A total of 85 (51 percent) of the 166 associate degree programs were placed in Group #2. Programs placed in this category represent 67 percent (57 programs) of the AA and AS degrees and 58 percent (28 programs) of the AAS degrees.



Of these 85 Group #2 programs, Rose offers 33 percent (28 programs), Redlands 34 percent



(29 programs), OCCC 26 percent (22 programs), and OSUTB-OKC 9 percent (8 programs). These 85 programs graduated 71 percent (4,561) of the Oklahoma City metro graduates over a five-year period and enrolled 75 percent (16,498) of the metro students in fall 1991. Of the 4,561 graduates, 45 percent came from Rose, 14 percent came from Redlands, 28 percent came from OCCC, and 14 percent came from OSUTB-OKC. Of the 16,498 students enrolled, 38 percent were at Rose, 8 percent were at Redlands, 44 percent were at OCCC, and 11 percent were at OSUTB-OKC.

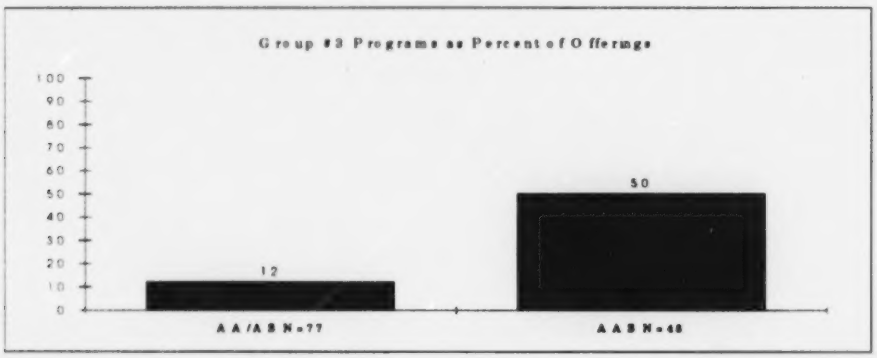
Some 34 (40 percent) of the 85 Group #2 programs are liberal arts and science transfer degree programs that graduated 1,463 (32 percent) of the students over a five-year period and enrolled 4,589 (28 percent) of the fall 1991 students. Five other liberal arts and science degree programs are offered by the four two-year metro institutions. Two already referenced are in Group #1; three (two modern language and a music program) are in Group #3. Rose and OCCC stagger the scheduling of the courses in modern languages in order to meet the metropolitan educational need without duplicating each other's efforts. The four two-year metro institutions offer 77 associate in science and associate in arts of which 39 (51 percent) are liberal arts and sciences. Some 34 (87 percent) of the liberal arts and sciences programs are in Group #2.

Some 23 of the 57 university parallel Group #2 degree programs prepare students for transfer to a career-oriented baccalaureate degree in business, engineering, education, or computer science. These programs graduated 998 (22 percent) of the students over a five-year period and enrolled 5,727 (35 percent) of the fall 1991 students. Some 28 (33 percent) of the 85 Group #2 programs are associate in applied science degree programs: 5 in health care, 12 in business (two of which are specialty management degrees), 7 in electronics/computer/engineering fields, 2 in child development, and 1 each in aviation and criminal justice. These programs graduated 2,100 (46 percent) of the students in this group and enrolled 6,183 (37 percent) of the fall 1991 student body.

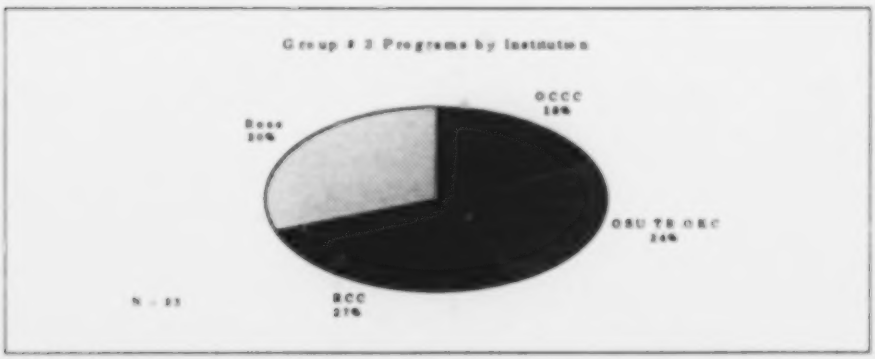
In summary, 57 (67 percent) of the degree programs in Group #2 are university parallel degrees and account for 63 percent of the graduates of Group #2 programs over a five-year period and 54 percent of the fall 1991 headcount enrollment.

REVIEW OF GROUP #3 METRO PROGRAMS

A total of 33 (20 percent) of the 166 associate degree programs were placed in Group #3. Programs placed in this category represent 12 percent (9 programs) of the AA and AS degrees and 50 percent (24 programs) of the AAS degrees.



Of these 33 Group #3 programs, Rose offers 30 percent (10 programs), Redlands 27 percent (9 programs), OCCC 18 percent (6 programs), and OSUTB-OKC 24 percent (8 programs).



These 33 programs graduated 11 percent (709) of the Oklahoma City metro graduates over a five-year period and enrolled 7 percent (1,363) of the metro students in fall 1991. Of the 709 graduates, 42 percent came from Rose, 8 percent came from Redlands, 16 percent came from OCCC, and 34 percent came from OSUTB-OKC. Of the 16,498 students enrolled, 47 percent were at Rose, 4 percent were at Redlands, 25 percent were at OCCC, and 24 percent were at OSUTB-OKC.

The majority or 24 (73 percent) of the 33 Group #3 programs are associate in applied science degree programs. Some 15 (63 percent) were in electronics, computer, engineering fields. Some 4 (16 percent) are in business. Some 3 (13 percent) are in journalism, and there is one each in aviation and home economics. These programs graduated 642 (91 percent) of the students in the Group #3 programs and enrolled 1,050 (77 percent) of the fall 1991 students in Group #3 programs.

METRO MARKET SATURATION COMPARISONS

Information contained in the "cooperative efforts" part of this study shows that the Oklahoma City metro institutions serve 5.48 percent of its population ages 15 to 44. Tulsa Junior College serves 4.25 percent of its population. For the state as a whole, public and private colleges and universities serve 6.33 percent of the ages 15 to 44 population.

Oklahoma City metro institutions serve a greater proportion of the area's larger population, but how are they providing services, and can services be provided more efficiently? Those questions prompted the State Regents to ask for data from the TJC multi-campus model for purposes of comparative review. The attachments to this Executive Summary contain this information.

DESIGN DESCRIPTION. The "market saturation comparisons" analyzes the following by location and by subject matter, and it also references the institutional program ratings:

- Number of courses/sections offered
- FTE produced

- Average section size
- Frequency distribution of section size
- Total cost
- Direct cost (includes faculty salary)
- Faculty salary
- Unit cost

A tabbed attachment to the study shows the number of courses and sections taught by the five metro institutions and Tulsa Junior College in 1992-93 as well as the other information referenced above.

With the exception of UCO, all of the institutions offer only lower division course work, and only UCO's lower-division courses and sections were included in the analysis.

The first column refers to the CIP (Classification of Instructional Programs) code for the content area. This national taxonomy is used by the federal government in its IPEDS (Integrated Postsecondary Education Data Survey) reports and is also the taxonomy used by the State Regents to code courses. After each change in the major CIP code, a subtotal by location is provided. (The first two digits of this six digit code denote the major field.) The final line provides the lower-division total by location.

The second column describes the subject matter. Where asterisks appear, codes not in the taxonomy have been used and the English equivalent has not yet been developed.

The third through seventh columns provide the name of the Oklahoma City metro institution.

The remaining columns contain data for each of the TJC campuses.

AREAS NOT NEEDING FURTHER ANALYSIS. There are several areas in the comparison models that most likely do not need further analysis.

AGRICULTURE, ARCHITECTURE, AREA STUDIES, BUSINESS, MANAGEMENT. The first six major CIPs (01 through 06: Agricultural Business, Agricultural Sciences, Renewable Natural Resources, Architecture and Environmental Design, Area and Ethnic Studies, and Business and Management) appear to have similar configurations in both the Oklahoma City metro area and in Tulsa. They are offered either in a limited number of sites (in the case of the first five) or are offered at multiple sites in both metropolitan areas.

COMPUTER SCIENCE, PSYCHOLOGY, PERFORMANCE AND STUDIO ARTS are other areas that demonstrate similar distribution properties and, therefore, will not be examined further. All three areas are offered at all sites in both metropolitan areas.

LIBERAL ARTS & SCIENCES. Similarly, many of the liberal arts and science courses (English, mathematics, science, social science, etc.) which form the core of

lower division general education, are offered appropriately at all campuses. It should be noted that OSUTB-OKC offers a very low number of these courses (43 compared to 128 at Rose, 159 at OCCC, and 100 at Redlands) because of its technical mission assignment. The placement of 87 percent of the liberal arts and science programs in Group #2 also reflects this traditional academic fact.

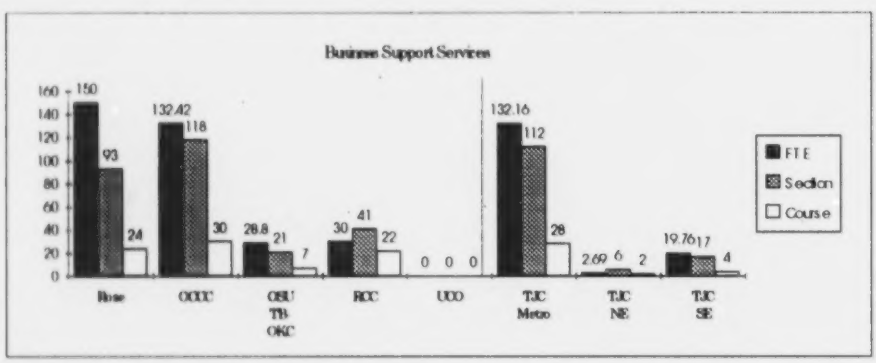
AREAS NEEDING FURTHER ANALYSIS. The following fields of study do, perhaps, need further scrutiny due to the difference in number of delivery sites in the two metropolitan areas.

1. BUSINESS SUPPORT SERVICES (07). This area has already been targeted by metro institutions. One institution identified one program in this area as an opportunity for increased collaboration. Two others view their duplicated offerings as justified.

   Courses are offered at four Oklahoma City metro sites but predominately at only one TJC campus. About 85 percent of the program's FTE in Tulsa are generated at the metro campus. The Tulsa exceptions (courses offered on more than one campus) are business English, word processing, and computer accounting.

   It should be noted, however, that two Oklahoma City metro institutions (Rose and OCCC) individually generate more FTE (150 and 132 FTE respectively) in this area than does TJC (132 FTE at one campus and 22 at two others).

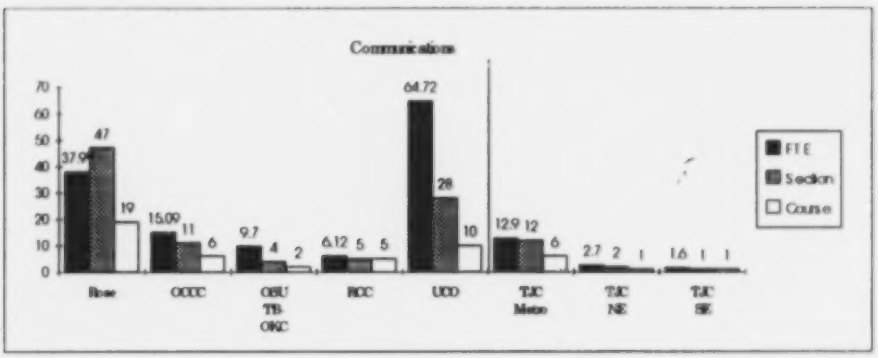
   In this subject area, section size is an unreliable indicator of efficiency, in that instruction may be delivered in various instructional formats--self-paced individual to traditional classroom environments.



2. COMMUNICATIONS (09). This area has already been targeted by metro institutions in that they have identified journalism as an area to examine for increased resource sharing.

FTE; whereas, all five Oklahoma City metro institutions together generate about eight times Tulsa's FTE.

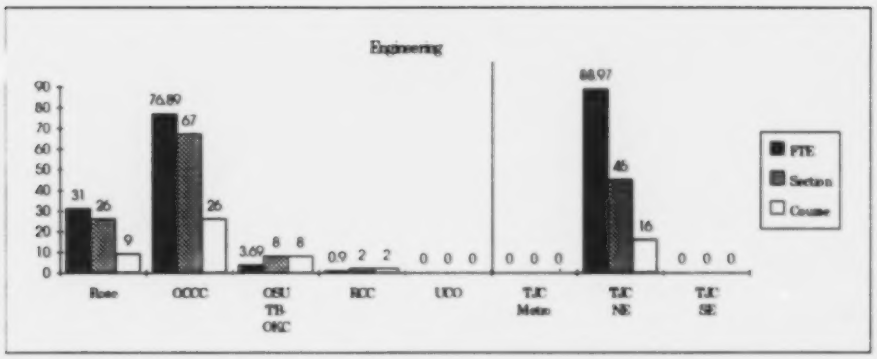
The metro institution review of several programs in this area for increased collaboration as well as the journalism program review soon to be undertaken by the State Regents will thoroughly examine the issues of employment opportunities, quality, and duplication.



3. ENGINEERING (14). This area has already been targeted by metro institutions as one for increased collaboration.

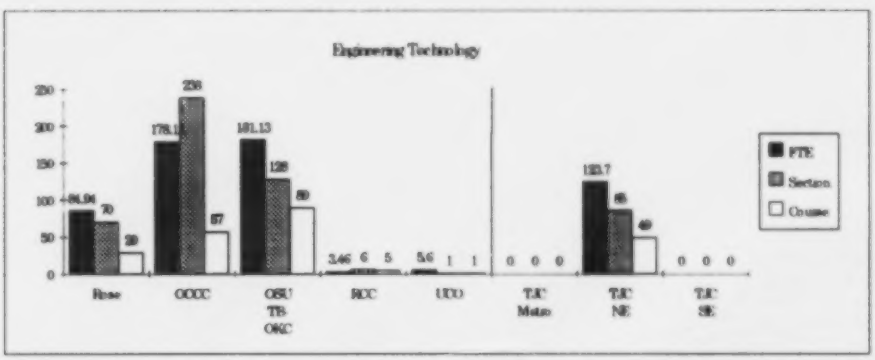
Clear difference in distribution of offerings exists. Tulsa has consolidated its programs on one campus. There are 89 FTE on the Northeast Campus where all engineering technology coursework is offered as well as protection services, mechanics, repair, precision production, and transportation courses. In Oklahoma City, three of the metro institutions provide significant course work. There are 112 FTE, 69 percent of which are served by OCCC. Similarly, in engineering technology, protective services, mechanics, repairs, and precision production, several metro institutions offer coursework in contrast to TJC's concentrating all courses in these areas at one campus.

Several programs in these areas have been identified by the metro institutions as possible candidates for enhanced joint offerings. To a lesser degree, engineering fits the pattern seen in business support and communications in that the offering of the course work at multiple locations in the Oklahoma City metro area versus a single location in Tulsa is coupled with significantly greater FTE production in the Oklahoma City area. Disparities in demand may make a strong case for duplicative effort.



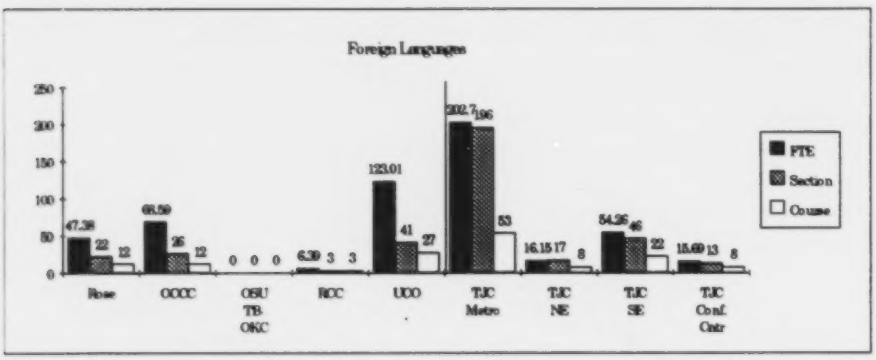
4. ENGINEERING TECHNOLOGIES (15). This area has also been targeted by metro institutions as one for increased collaboration.

Enrollment patterns are similar to those for engineering; however, a major difference is the FTE generated. There are 453 FTE at the Oklahoma City metro institutions versus 124 FTE at TJC's Northeast Campus. Also, OCCC and OSUTB-OKC individually generate more FTE than TJC. To what extent these FTE result from cooperative agreements is not clear. The Oklahoma City metro institutions consider this area to be an appropriate one for collaborative efforts with the area technical schools.



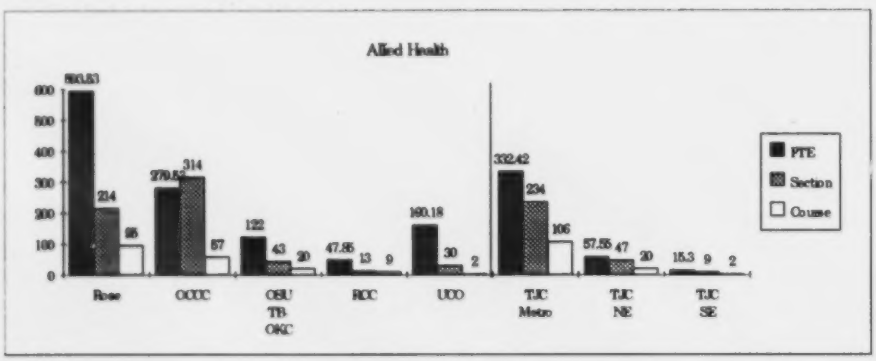
5. FOREIGN LANGUAGE (16). This area has been targeted by Oklahoma City metro institutions as one for increased collaboration. Rose and OCCC are already collaborating in this area, and the institutions have coded programs in this area as appropriate for increased collaboration. Foreign language is interesting in that the two metro areas with different educational delivery systems are developing a similar distribution pattern in that only three of the Oklahoma City institutions do any significant work and two of those are coordinating their classes to reduce duplication.

Tulsa offers 53 courses and 196 sections predominantly at one campus (203 FTE at the metro campus and 86 FTE at other campuses). Four Oklahoma City institutions offer 54 courses and 92 sections (245 FTE).



6. ALLIED HEALTH (17). This area has not been targeted by the metro institutions. At first glance this field might seem one in which more centralization should occur. In examining the minor fields, however, it appears that the metro institutions have generally divided this area with the exception of medical laboratory technology, emergency medical-paramedic, and medical technology. Strong arguments can be made for duplication in these areas in that this training meets local community needs, especially in the case of Redlands.

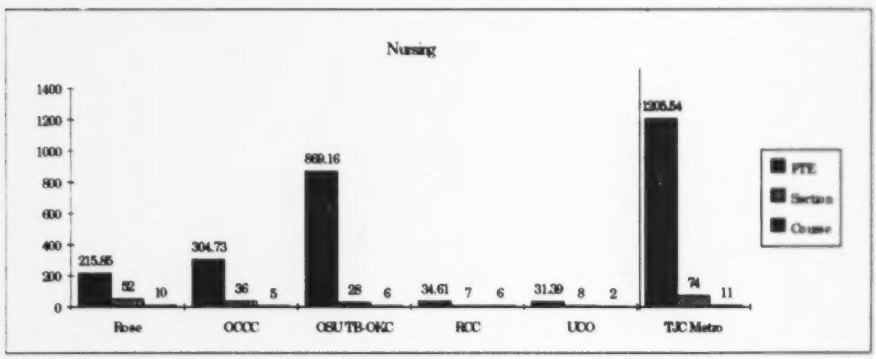
As mentioned earlier in the Section on Group #1 programs, 11 (69 percent) of the Allied Health programs are placed in Group #1 and are highly job-specific and are not duplicative.



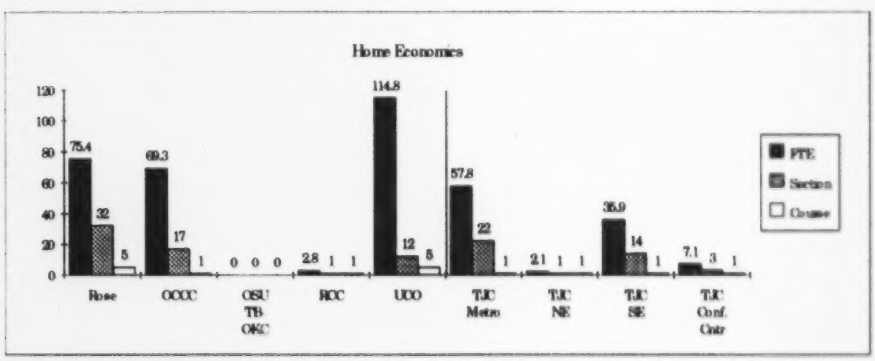
7. BASIC CLINICAL HEALTH SERVICES (18). This area has not been targeted by the metro institutions. Nursing is the only minor field in this area and reveals a stark difference in the two areas. Tulsa's nursing courses are all on one campus

and Oklahoma City's are on five. Consolidation may prove contentious. The institutions see these programs as justified duplication.

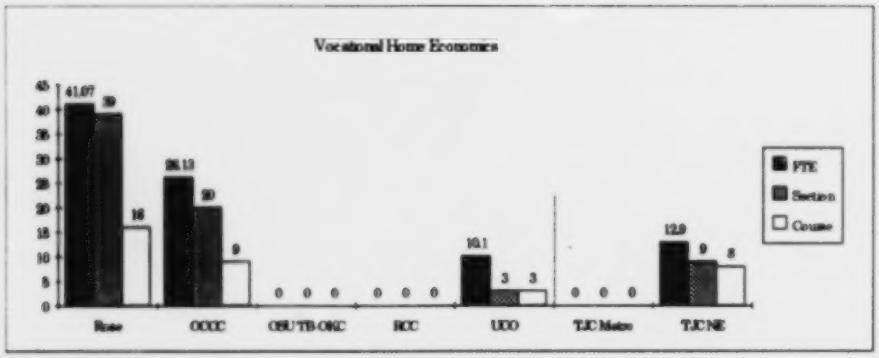
TJC generated slightly less FTE (about 1,200) than the five metro institutions (about 1,400). However, fall 1991 headcount enrollment at the two-year Oklahoma City metro institutions was about 2,400 students compared to 371 for TJC. Graduates for the last five years were 1,150 for the Oklahoma City institutions and 490 for Tulsa. Since Oklahoma City institutions are graduating twice as many nursing graduates, some duplication can be justified.



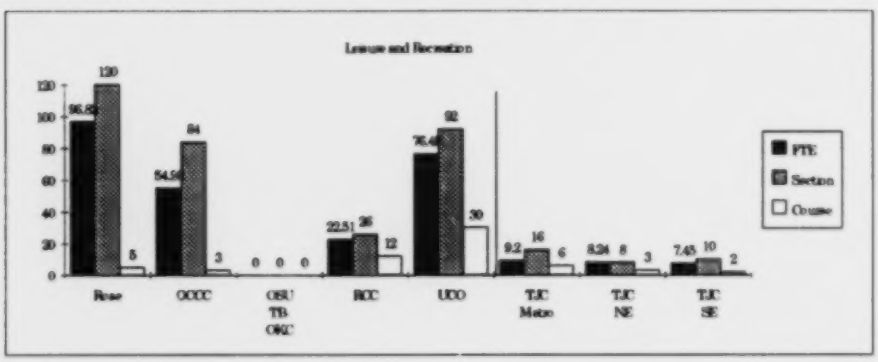
8. HOME ECONOMICS (19) AND VOCATIONAL HOME ECONOMICS (20). Outside of nutrition and child development, Tulsa offers little course work in this field. The Oklahoma City metro institutions have identified programs in this area that can be explored for increased collaboration.



19

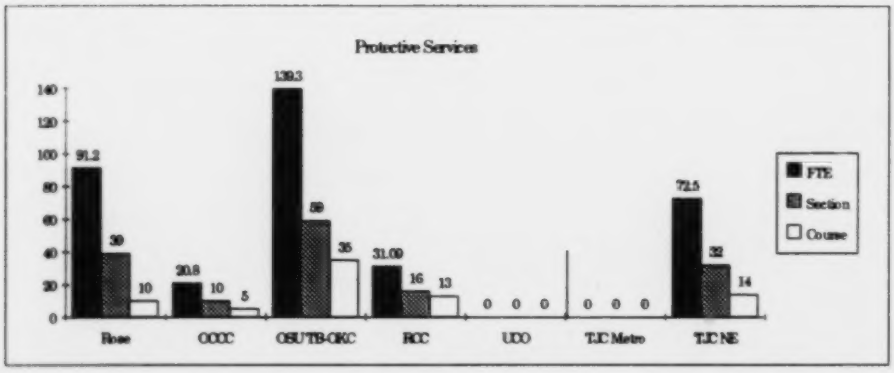


9. LEISURE AND RECREATIONAL ACTIVITIES (36) AND PERSONAL AWARENESS (37). Tulsa has very little credit coursework in these areas compared to Oklahoma City. Oklahoma City generates ten times the FTE in Leisure and recreational activities than does TJC and five times the amount in health and physical practices. These data will change, especially with respect to OCCC, in that these courses have not been offered at OCCC for credit since fall 1993.



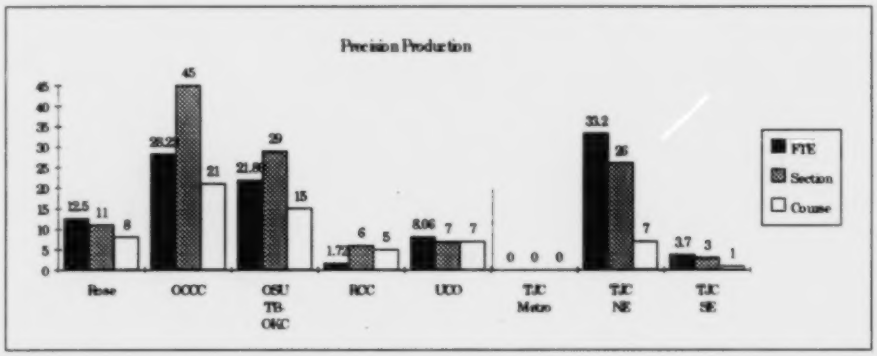
10. PROTECTIVE SERVICES (43). These programs have not been identified by the metro institutions for increased collaboration.

Like nursing, Tulsa's programs are consolidated on one campus. Oklahoma City teaches it at four. OSUTB-OKC ranks its program as unique; the other institutions code theirs as duplicated but justified. OSUTB-OKC has the only fire protection specialty, and there are other differences. The institutions do not see their programs as duplicative.



11. PRECISION PRODUCTION (48). These programs have been identified as areas for increased collaboration

Tulsa offers almost all work in this area and in Mechanics and Repairers (47) on one campus. Oklahoma City has it on all five. However, in the minor fields with the most duplication (drafting, general and commercial art), the metro institutions have indicated a willingness to negotiate. Also, some of the specialized work in this area is provided through cooperative agreements with vo-tech.



SOME PRELIMINARY OBSERVATIONS.

Some preliminary observations include:

- The continued work on collaboration and its expansion will of necessity involve increased staff and faculty. Each institution has program review processes in place, and it is through this process that it will be determined whether collaboration is feasible or whether the program shall be deleted. The process will require the time and involvement of appropriate faculty and staff.

- Only a small percent of students enroll in more than one institution. Although the exact number of students that enroll in more than one Oklahoma City metro

institution was not calculated, it was determined that less than 4 percent of the lower-division students enroll simultaneously on more than one campus.

- Articulation concerns expressed by the public and state leaders have likely been magnified beyond reality. Most student credit hours will transfer with little or no difficulty. When problems occur, they are usually resolved by institution-to-institution dialogue. In the metro area, it can be said with certainty that 70 percent of the student credit hours produced will transfer readily because they are in lower-division general education. It can be said that almost all student credit hours transfer. The difficulty occurs because degree programs have specific course requirements and, although the student credit hours will transfer and count toward the baccalaureate, they do not always count toward the degree requirements. If a student is poorly advised, uncertain of his/her educational goal, or switches his/her major, the situation can arise in which credits earned will not apply toward the major requirement. This legitimate academic requirement of meeting requirements for the major can result in a student taking more than the usual 120 hours for the baccalaureate.

- This report focuses on current efforts to streamline and minimize the problems and recommends a preventive system whereby the student knows before he takes the course the universities to which it will transfer and also the degree programs to which it will transfer.

- One recommendation made in both sections of this study holds particular promise. The concurrent review of like-type degree programs and the sharing of the self-studies and evaluation results is expected to result in significant resource sharing. Over time, it would be expected that the advantages of combining forces for needs assessments, hiring specialized faculty to serve more than one institution, joint offering of expensive programs, and dividing up the expensive courses, would outweigh campus boundary considerations.

PRELIMINARY RECOMMENDATIONS.

THE 21 INSTITUTIONAL RECOMMENDATIONS. The Oklahoma City metro institutions have formulated 21 recommendations to address continued and expanded cooperation and collaboration between and among the five Oklahoma City campuses. The recommendations are endorsed as follows:

INSTITUTIONAL RECOMMENDATIONS ON ARTICULATION & TRANSFER:

1. Develop and implement electronic transfer of transcripts among the metro area institutions.

2. Develop generic numbering system for transfer curriculum.

3. Develop generic numbering system for occupational/technical curriculum.

3. Develop generic numbering system for occupational/technical curriculum.

4. Develop and implement standing committee to maintain generic numbering system.

INSTITUTIONAL RECOMMENDATIONS ON PROGRAMS:

5. Increase collaboration between institutions (particularly in engineering, electronics, and modern languages).

6. Coordinate program reviews for programs in common between/among institutions.

7. Commence dialogue between institutions before and during development of new program proposals.

INSTITUTIONAL RECOMMENDATIONS ON EXPANSION OF EXISTING COLLABORATIVE EFFORTS.

8. Develop compatible academic calendar.

9. Expand collaborative efforts when developing course schedules to provide maximum utilization of resources and effective use of resources.

10. Continue and expand collaboration/agreements among institutions and implement electronic transfer of information.

11. Expand shared learning resources. Electronic sharing of information and resources, e.g., CD-Roms.

12. Expand shared learning resources: Share information relating to resources in each LRC so faculty can help students understand where in the metro area materials are available.

13. Explore and implement the sharing of faculty through electronic delivery of classes.

14. Continue and expand staff development activities.

15. Share innovative teaching methods and materials.

16. Develop system for common assessment of incoming students and sharing of information.

INSTITUTIONAL RECOMMENDATIONS ON BENEFITS TO STUDENTS

17. Share schedules among metro area institutions and explore electronic sharing of schedules.

18. Expand ability to advise students regarding each other's programs/courses.

19. Expand knowledge of what is in other LRC's and utilization of shared LRC resources.

INSTITUTIONAL RECOMMENDATIONS ON MARKET ANALYSIS AND COST OF DELIVERY OF SERVICES

20. Market analysis of geographic areas that appear not to be as well served as other areas and develop appropriate programming.

21. Focus resources to increase quality and delivery of programs.

ANALYSIS AND ADDITIONAL RECOMMENDATIONS. Recommendations coming forward from the Oklahoma City metro institutions go substantially beyond the areas targeted by the State Regents in this study. Staff recommendations, therefore, are as follows:

1. 21 INSTITUTIONAL RECOMMENDATIONS. Accept and endorse the 21 institutional recommendations.

   Recommendation #6 in particular holds substantial promise for the fine-tuning of existing programs. We would expect the following institutional requests to develop as a result of this recommendation: requests for program deletions, modifications, and joint offerings. This and other recommendations are expected to result in improved services to students and greater efficiencies in the delivery of offerings.

   Recommendation #5 promises intensive review and cooperation regarding Group #3 programs, particularly those targeted on the market saturation comparisons.

2. TELECOMMUNICATIONS. The State Regents are currently working with independent telecommunications companies to negotiate affordable lease line rates which will facilitate the connection of the Oklahoma City metropolitan two-year institutions into the State Regents' telecommunications network. This connection will allow for full voice, video, and data transmission interaction--not only among the five institutions, but also within the entire network. Staff will continue to work with the statewide telecommunications committee in an effort to receive a portion of the $14 million for equipment necessary to fully activate the institutional sites with the State Regents' network. Initial negotiations with the telecommunications carriers have been very promising; full connectability could be obtained within the next six months.

3. PROGRAM EVALUATION. All programs, and particularly those in Group #3, should be regularly evaluated; and the results should be reported as provided by policy to the State Regents. All lower-division metro programs should be continuously evaluated by the metro institutions for increased collaboration and recategorized as necessary.

4. REPORTS. This report does not make recommendations for program deletions or realignments but rather endorses a long-range process for achieving those ends. Now that the issues are on the table and a process is in place for addressing targeted areas of concern, this report should signal a respite in the Oklahoma City metropolitan study series. So that progress can be readily ascertained, it is recommended that regular reports be provided to the State Regents on cooperation/collaboration issues. Reporting should be reflected and transmitted to the State Regents in the form of:

   (a) the Academic Plans of each institution/branch, (Institutions will indicate in their academic plans the reprioritization of programs and reallocation of funds, any evidence of collaboration in joint offerings, alternative offerings, and other innovative cooperative efforts.)

   (b) minutes from meetings of the metro institutions, and

   (c) an annual collective report.

   The reporting should review the status of all Group #3 programs and report progress regarding the 21 recommendations.

AVIATION APPENDIX

Building on the accomplishments and linkages that have been forged with the Oklahoma City metropolitan two-year schools regarding lower division offerings, Phase Two of the Metro Study will focus on the coordination of aviation/aerospace programs.

By way of review, the task force assembled by the State Regents for the purpose of examining aviation/aerospace education programs in the State System noted in its report a need to determine :

1. the extent to which regional collaboration/coordination of specific aviation/aerospace programs of study might be accomplished, and

2. the extent to which two-year institutions, in coordination with area vocational-technical schools might work together to meet the pilot training and/or aviation maintenance needs of industry in the state.

Since February, a working committee of academic administrators and faculty from the Oklahoma City area two-year institutions,* vocational-technical schools,** the University of Oklahoma, Oklahoma State University, and representatives from the Federal Aviation Administration, the Aeronautics Commission, and the Oklahoma City public schools have been meeting to examine ways educational institutions and private industry might work together to deliver better aviation/aerospace education in the Oklahoma City metro area. A progress report, along with a plan of action, is being prepared and should be ready for presentation to the State Regents at their May meeting.

* Oklahoma City Community College, Oklahoma State University Technical Branch - Oklahoma City, Rose State College

** Metro Tech Vocational-Technical Center and Francis Tuttle Vocational-Technical School

COOPERATIVE EFFORTS AMONG METRO AREA HIGHER EDUCATION INSTITUTIONS

Purpose of the Study

At their August 13, 1993, meeting, the Oklahoma State Regents for Higher Education requested the Chancellor and State Regents' staff in cooperation with the five Oklahoma City metropolitan area public colleges and universities to design and implement a structure that would ensure the efficient and effective delivery of educational services to the Oklahoma City metropolitan area for the fall 1994 semester.

This report describes the current status and addresses proposed areas for continued and increased cooperative efforts of the five Oklahoma City metropolitan area public colleges and universities. The study committee acknowledges cooperative efforts exist with other metropolitan area colleges and universities; however, the report is limited to the five institutions involved in the metro area study.

Process

The Chancellor met with the presidents of Oklahoma City Community College, Oklahoma State University Technical Branch - Oklahoma City, Redlands Community College, Rose State College, and the University of Central Oklahoma to discuss objectives, issues, and procedures. The Assistant Vice Chancellor met regularly with the Academic Vice Presidents to focus on an analysis of existing cooperative efforts and the provision of higher education opportunities in the metro Oklahoma City area, to review program information, and to discuss areas for expansion of cooperation and collaboration. The study focused on five major areas: (1) Articulation and Transfer of Courses and Programs, (2) Programs Offered, (3) Existing Collaborative Efforts, (4) Benefits to Students, and (5) Market Saturation and Cost of Delivery of Services.

The cooperative efforts of the higher education institutions in the Oklahoma City metropolitan area focus on providing programming and services to students and to the improvement of the institutions. The areas of cooperation include but are not limited to services to students, articulation of courses and programs, professional development, library resources, and delivery of programs. Each of the institutions involved in the metro area study is also involved in one or more of the following cooperative efforts: (1) Cooperative agreements with area vocational technical schools; (2) Concurrent enrollment classes at area high schools; and (3) Cooperative activities with higher education institutions not included in this study of the metro area.

1

Representatives of each of the institutions provided information about the institution and the present status of collaborative efforts, participated in the analysis of information, and contributed to the development of the recommendations. The proposed areas for continued or increased collaboration are recommendations of the academic vice presidents and have been discussed at the Metro Area Academic Officers meetings. The vice presidents acknowledge that to successfully continue and to expand cooperative efforts will require the involvement of faculty and administration at the participating institutions.

I. Articulation and Transfer of Courses and Programs

Students in the metro area have the opportunity to concurrently enroll at one or more higher education institutions. The Oklahoma State Regents staff provided information on multi-campus enrollment for Fall 1992. The number of students enrolled in two or more institutions of the Oklahoma City area institutions were determined (Appendix A). The following table summarizes this data and suggests that more than 96 percent of the students enrolling in higher education institutions attend only one institution in the metro area.

The ability to transfer courses between/among institutions enables students to pursue their educational goals. Metro colleges often refer students to other metro campuses to best accommodate their program or specific needs.

Present Status

OSRHE staff provided an analysis of transfer patterns among metropolitan institutions. This fall 1992 snapshot analysis shows the number and percent of unduplicated headcount enrollment at the metro institutions of: lower division students enrolled in a single metro institution; lower division students enrolled in more than one metro institution; and lower division students enrolled in a metro institution as well as another public college or university (Appendix A).

The following items were discussed relating to course transferability:

1. All general education course work transfers.

2. All program specific course work transfers and counts toward the 120 plus hours of the baccalaureate degree, but not necessarily as part of the major requirements.

3. A distinction needs to be made between credit hours transferring and credit hours meeting degree program requirements.

4. The applicability of program specific credit hours toward a degree program is not a function of whether the student is transferring to another institution but is a function of whether the student is seeking a degree toward which program specific credit hours apply--specifically, a student switching majors either within an institution or between institutions faces the same situation: nursing credit hours will not count as degree requirements for an English degree either at the same institution or another one.

Course equivalency has been determined for most general education courses offered by the institutions involved in the study. An analysis of the general education course work that transfers without difficulty as a percentage of the courses offered (only lower division courses at UCO are included) and of the student credit hours produced (FTE) shows that conservatively, a minimum of 70 percent of the course work at the metro institutions would transfer without difficulty; in general 100% of the course work applies to the 120 credit hours required for a baccalaureate degree. (Attachment: Metro Area Study: General Education Courses (Appendix C). Specialized courses are evaluated in relation to similar courses offered at the receiving institution and in relation to program requirements. Determining course equivalency through the course inventory information shows course numbers and course titles may vary.

Through the advisement process, each of the institutions emphasizes the identification of a major area of study and educational goal early in the educational experience. Each of the institutions provides advising services for students. However, each finds that the student who enters college undecided upon an educational objective often enrolls in courses that will not directly apply to the requirements of the program eventually selected.

UCO advising at two-year institutions. The transfer of students from the two-year institutions to UCO is enhanced by the utilization of transfer advisors at the two-year institutions.

The UCO Enrollment Center employs a full-time Transfer Advisor. This position was created in 1992 in response to the institution's Metro Central Transfer Consortium Agreement which has been formalized with the Oklahoma City area schools.

The Transfer Advisor maintains office hours at OCCC, OSU/OKC, Rose State, Redlands, and UCO. This advisor acts as a resource person for academic information and decision making strategies. Special focus is placed upon advising future students as to the transferability of courses to the University of Central Oklahoma programs.

The Transfer Advisor has been well received at the institutions by both administration and students. Future plans for the Transfer Advisor include providing technology which will allow for better tracking accessibility to computerized transfer articulation table, and perhaps even on-site registration for classes.

Degree audit report system. The University of Central Oklahoma developed the (DARS) Degree Audit Report System to enable students to have information upon entry into the University. The DARS produces a degree audit, the result of the comparison of students record (UCO and transfer courses) relative to program requirements. The audit indicates which degree requirements the student has completed, which remain to be completed, and what is needed to satisfy the remaining requirements.

Transfer evaluation element of DARS. The Transfer Evaluation Element of DARS consists of tables on which to input the articulation for each transfer course. To date, UCO has entered all the courses listed in the 1993-94 catalogs of Rose State College, Oklahoma City Community College, Redlands Community College, Oklahoma State University Technical Branch-OKC, Oklahoma State University and University of Oklahoma. A second group of six feeder schools is now being evaluated. Courses not evaluated in these two entries will be identified and entered as they are received from individual transcripts.

Because this information is continually updated, advisors access this table directly from their computer terminals. The information is also being developed into hard copy to be used as a transfer guide by feeder schools. Efforts are currently taking place to provide access to this information by the UCO advisor located at the metropolitan area community colleges.

The capability to provide transfer students a hard copy of their computer generated evaluation immediately upon transfer is a high priority goal. For this to occur, student transcript data must be on the computer. UCO anticipates the use of SPEEDE, a system of electronic transfer of student transcripts from one school to another, to facilitate the process considerably.

UCO accepts all credited course work from the metropolitan community colleges (except 0-level courses). UCO also provides elective credit in departments for which there is no appropriate equivalent course; i.e., Horticulture, Automated/Aerospace, Manufacturing, Automotive Technology, Electronics, Emergency Medical Technology, Hospitality Management.

The sequencing of content and courses may vary among institutions. Although a student may achieve the same competencies upon completion of a series of courses, the course content to reach the competencies may vary. Therefore, when transferring some courses, the review of content and the courses completed becomes very important. An example of this are the students enrolled in Spanish courses at OCCC and UCO. OCCC students complete SPAN 2113 Intermediate Spanish I and SPAN 2223 Intermediate Spanish II. The first course description includes "Reading, composition, conversation, and grammar;" the second course is "A continuation of 2113." AT UCO there are four courses in Intermediate Spanish: (1) SPAN 2113 Intermediate Spanish Grammar; (2) SPAN 2132 Intermediate Spanish Readings; (3) SPAN 2153 Intermediate Spanish Composition; and (4) SPAN 2173 Intermediate Spanish Conversations.

Articulation agreements. Two-year college transfer is enhanced by the implementation of articulation agreements between UCO and the two-year institutions Special 2+2 articulation agreements have been established with UCO and Oklahoma City Community College to transfer degrees in technical fields and diversified studies to baccalaureate degrees in Training and Development and in Technology Education. Oklahoma State University Technical Branch-OKC has 2 + 2 articulation agreements with the UCO Training and Development Program for three AAS degree programs: Industrial Loss Prevention, Fire Protection Technology, and Municipal Fire Protection. Rose State College and the University of Central Oklahoma have a long-standing 2 + 2 articulation agreement for the Associate in Science: Biology and the Bachelor of Science: Biology. Copies of the agreements are included in Appendix D.

Other activities. Computer science faculty from the two-year institutions developed common course titles and course numbers for a core of computer science courses. The discussions included content and objectives of the courses. The transfer of a common core of courses to four-year institutions was pursued. The faculty realized that not all institutions will offer all the same courses and that not all courses will transfer to a four-year institution. Metro area registrars are working to develop a common application form for admission.

Recommendations for Expanded Efforts

All five institutions must be linked for the system to work effectively and efficiently. Electronic transfer of information in the DARS program supports State Regents' policy that transfer students with Associates in Arts and Associates in Sciences degrees from Oklahoma community colleges have met the basic general education requirements. The electronic transfer of financial aid information is also anticipated.

A limiting factor to the establishment of the computer communications system is funding. Financial resources to enable the development and implementation of the system must become a priority.

Generic course numbering. To enhance the ease of determining equivalency of courses, a generic course numbering system needs to be established for course identification.

The Oklahoma State Regents for Higher Education Course Inventory Format includes a field for a generic code for each course. The development of the Generic Course Inventory will rely heavily on faculty expertise in the content areas. The Generic Course Inventory will provide distinctions between remedial and non-remedial courses. The faculty, under the supervision of the instructional administrators, will develop the generic coding for courses to identify equivalent courses.

Transfer and occupational-technical courses will be included in the Generic Course Inventory. The first third of the development of the generic numbering system for the transfer curriculum will be completed by Spring 1995 with the target date for completion of the system being the Spring of 1997. The program areas identified for increased collaboration will be included in the first courses considered in the process.

Approximately 20 percent of the occupational-technical generic numbering system will be completed each year beginning with the 1994-95 academic year and concluding in Spring 1999. The program areas to be involved each year will be coordinated with the existing program review process. The existing program schedules for the five institutions are summarized in Appendix O.

II. Programs Offered

The study of academic programs offered in the metropolitan Oklahoma City area was initiated by reviewing the inventory of the programs from five institutions included in the study. The Oklahoma State Regents for Higher Education staff prepared a list of the programs from each of the institutions with a five-year history of degrees conferred and the headcount enrollment by program. Each of the academic representatives from the five institutions worked with appropriate members of their institutions in reviewing the information and classifying the programs for their institutions into the following classifications: (1) unique programs -- insufficient student demand for more programs; (2) programs within the metropolitan Oklahoma City area with adequate demand to support the programs; (3) programs for which student demand indicates possibility for expanded cooperative scheduling or cooperative efforts among Oklahoma City area institutions; and (4) program areas at the University of Central Oklahoma with possibility for expanded articulation agreements. The summary of the metropolitan institutions' programs and classifications is provided in Appendix E.

Present Status

A review of past and present practices between and among the five metropolitan institutions included in the study reveals substantial and varied efforts to effectively and efficiently utilize resources to serve students, business, industry, and agencies in central Oklahoma. Among those efforts are cooperative agreements between higher education institutions and area technical schools, collaborative efforts between institutions to provide opportunity for students to progress through academic programs by taking courses at two or more colleges, and agreements for other institutions to provide instruction from unique programs in an institution's service area. Other cooperative efforts are sharing of program directors, cooperative efforts in providing outreach courses, and providing internship opportunity at two-year colleges for graduate students from the University of Central Oklahoma.

A list of some existing and past cooperative efforts is provided below.

1. Participation in a metropolitan area study with vocational-technical schools, Rose State, and OSU-TB on metro area Youth Apprenticeship Programs.

2. Discussion under way for collaborative efforts in electronics and engineering.

3. RSC and OCCC cooperate in serving area business and industry. OCCC instructs courses at the General Motors plant and RSC at FAA in program areas unique to their campuses.

4. OSU-TB instructs courses at TAFB in program areas unique to their campus.

5. Oklahoma City Community College and Redlands Community College have a cooperative agreement allowing students interested in pre-agriculture to conveniently co-enroll at both institutions.

6. OSU-TB provides the ETOP program at AT&T.

7. Two-year institutions provide sites for internships and practicums for UCO students.

8. UCO offers upper-division courses on the Oklahoma City Community College and Rose State College campuses.

9. Oklahoma City Community College and Rose State College cooperatively schedule modern language courses and jointly offer specific classes in Spanish and French.

10. Rose State College provides remedial courses on the UCO campus.

11. Rose State College and Oklahoma City Community College coordinate the offering of American Institute of Banking courses in the metro area.

12. RSC and OCCC shared a nursing program director.

An analysis of the course inventory and program ratings provided in Appendix E reveals several unique programs (Category 1) at each of the five institutions. These programs are unique for a particular institution for varied reasons.

These programs were developed to meet a particular need in each of the institutions' service areas and, in many instances, developed at the request and in cooperation with an agency or industry. For the most part, Category I appears to include associate of applied science degree programs offered by the two-year colleges, although there are some exceptions.

A review of programs listed as programs with adequate demands to support the program (Category 2) indicates that for the most part these programs are basic to any institution offering associate of arts and associate of science programs, baccalaureate degree programs, and/or associate of applied science and/or specialized baccalaureate degree programs for which there is high student demand.

A close observation of programs for which student demand indicates possibility for expanded cooperative scheduling or cooperative efforts among institutions (Category 3) provides institutions with opportunities for restructuring of programs and reallocation of resources.

A look at program areas at UCO with possibilities for expanded articulation agreements (Category 4) suggests that institutions can improve the ease of transfer for two-year college AA and AS degree students seeking the baccalaureate degree. Additionally, the possibility exists that innovative approaches can provide more transfer opportunities for two-year college AAS graduates to UCO.

All five institutions participating in the study have established internal program review procedures which provide for review of all of the programs listed in the program inventory. Discussion among institutions indicate that the sharing of program review information among the institutions would enhance the delivery of courses and programs as well as provide for the possibility of increased cooperation. Shared program review information should also be valuable to the two-year institutions in the restructuring of associate of applied science degrees which must stay current with demands for business, industry, and agencies.

Recommendations

The following recommendations concerning the programs area of the study are made after careful review of the present status, analysis of the classification of the program inventories of the five institutions, and extensive discussion among institutional representatives.

1. Institutions should study, discuss, and develop procedures for increased collaboration in regard to programs listed in Category 3. These increased collaborative efforts should include shared scheduling of courses with low student demand on one or more campuses, restructuring of programs, and the deletion of certain programs by one or more institutions.

2. The institutions should restructure their program review sequences to provide for the review of like-type programs during the same year. Program review of like-type programs should be shared among the five institutions. Appropriate institutional representatives should jointly

discuss the program review results and take action to ensure the maximum use of resources and to provide the best possible delivery of academic programs to students in the metropolitan area.

3. Institutions considering the development of proposals for new academic programs should initiate dialogue with the other metropolitan institutions as soon as the program is identified. Dialogue should continue at stages during the program development to prevent unnecessary duplication and provide for cooperation when possible.

III. Existing Collaborative Support Activities

Present Status

Calendaring. Metro area academic officers develop a compatible academic calendar. The needs of the institutions involved in the metro area study as well as the schedule for the University of Oklahoma are discussed. Initiating the discussion early in the preceding semester provides time for the institutional representatives to discuss the variability of the academic calendars within their institutions and to make changes that will provide for consistency. The uniqueness of the institutions and the student populations suggests three additional factors which are taken into account:

1. The vacations of the area vocational-technical schools that have cooperative agreements,

2. The vacations of the area high schools that have students attending some college classes, and

3. The professional development days for faculty that each institution provides within their academic calendar.

The higher education institutions have established a common start and stop date in the academic calendar for all metro area campuses. Appendix F presents the comparison of the 1994-1995 academic calendars.

Scheduling. Operating within OSRHE policies, each of the higher education institutions in the metro area provides programming in a variety of schedule sequences to provide multiple options for the students. These schedule sequences include the traditional 16-week semester; four-week, six-week, and eight-week sessions; and two-days or more seminars.

Courses are provided in a variety of time frames that enables students to enroll in morning, afternoon, late afternoon, evening and weekend courses. Through flexible scheduling, the institutions meet the needs of traditional students, adults student, and business and industry.

As class schedules are built, discussion among and between institutional representatives provides for coordination of time frames and schedule sequences. The discussion of collaborative efforts of the metro area higher education institutions provides information about departments that work together when scheduling courses within their program areas. Examples of cooperation in scheduling include:

1. OSU-OKC and Rose State work together to schedule electronics courses in day and evening hours and alternate semesters in order to reduce duplication. Students are referred back and forth between programs.

2. RCC and OCCC schedule agriculture and program support courses to enable students to enroll at both institutions.

Staff development. Metro area institutions work together to schedule in-service activities and extend an invitation to personnel from other institutions to participate in scheduled activities. Examples of cooperative staff development activities include:

1. Each metro-area higher education institution has extended invitations to others to attend teleconference/videoconference programs.

2. Rose State College licensed a national two-part teleconference on Assessment in the Community Colleges in Fall 1993 and invited other colleges to participate free of charge. Seven other community colleges sent representatives.

3. OSU-OKC hosted a multimedia workshop to demonstrate hardware and software. Representatives attending came from OSU-OKC, Oklahoma City Community College, and Redlands. Workshop dates were February 19, March 12, and March 19, 1993. As the institutions have introduced multimedia instruction, several joint multimedia meetings held.

4. ADA Professional Development Activities.

5. Rose State College cooperated with Oklahoma City Community College for the August 1992 Faculty/Staff Development program. The two colleges are exploring other possibilities for shared expenses in staff development.

6. Rose State College organized a workshop on Statistical Package for Social Sciences (SPSS) to assist colleges with new software tools for assessment. Staff members from research and computers services at the University of Oklahoma and Oklahoma City Community College participated in the week-long, forty-hour training session.

7. Oklahoma State University Technical Branch - OKC nursing faculty provided a workshop for the Oklahoma City Community College nursing faculty in which the OSUTB-OKC computer lab and various programs, computer testing, access to FITNE electronic bulletin board, and interactive video disc programs were explained and demonstrated.

8. The Oklahoma City Community College faculty shared information about their honors program with Rose State College faculty. Assistance will be provided as needed.

Examples of the written communications between/among institutions are included as Appendix G.

Library. A formal organization of metro area libraries called Metronet allows libraries to receive discounts from many different library vendors (Appendix H). The organization also holds

meetings in which members discuss continuing education topics and information relating to the field of librarianship.

The Academic Library and Learning Center Directors (ALLCeD) is an organization of metro area library directors or their representatives which was formed in 1973. Activities include:

Cooperative acquisitions of periodicals.
Reciprocal borrowing for students from member libraries.
Sharing information with colleagues.
Other cooperative activities of the library directors include:

1. The library investigated the possibility of sharing Rose State's automated library system. Even though it was decided this would not be cost effective, Rose State's staff was very anxious to look into the possibilities.

2. An informal agreement was formed among Rose State, OSU-TB, and OCCC to share resources and FAX information.

Telecommunications. Rose State College coordinates the scheduling and licensing of telecourses statewide through the Higher Education Telecommunications Association for fifteen other colleges, including Oklahoma City Community College, Redlands Community College, University of Oklahoma, and Tulsa Junior College (Appendix I). In addition to licensing, HETA has coordinated state and regional faculty/staff telecommunications workshops.

Other communication linkages. Personnel from the metro area institutions have established regular meeting schedules to enhance communications among/between institutions. Examples of groups that meet on a regular basis are:

1. Academic officers from the metropolitan area public higher education institutions meet monthly.

2. Registrars meet regularly to discuss implementation of Regent's policies.

3. Nursing (ADN) Educators and Service Administrators of the Metropolitan Oklahoma City Area (NESA) meet bimonthly. The associate degree nursing deans and directors also participate in the Oklahoma ADN Directors Council which meets bimonthly.

4. Personnel officers share institutional manuals and handbooks.

Recommendations for Expanded Efforts

The following recommendations are made after an analysis of existing collaborative efforts and a discussion of areas for increased cooperation and collaboration.

Calendaring and scheduling. The metro area higher education institutions should continue to utilize the procedures in place to develop compatible academic calendars. In addition, an expansion of collaborative efforts to develop cooperative scheduling of courses to accommodate

student needs. Development of a common scheduling time for some courses should be investigated. Particular attention should be paid to collaboration in the program areas having been identified as having potential for more collaboration to assist the institutional efforts to maximize the utilization of resources and to assure effective use of resources.

Learning resources. Continued efforts should be made to share resources, to make faculty and students aware of the resources at each of the higher education institutions, and to develop the library systems. Librarians and MIS personnel should investigate and consider development of a system for electronically sharing information and resources which would include CD-ROM libraries and other electronically stored information.

Staff development. The institutions should continue to share staff development programs and should investigate additional areas in which collaborative efforts can be developed. Appropriate institutional representatives should develop a process for developing cooperative staff development activities and for sharing staff development activities being made available to all of the metro area higher education institutions (example is the OCCC sharing of Fall 1993 and Spring 1994 teleconference and videoconference schedule in Appendix G).

Other areas. Appropriate representatives from the institutions should be involved in study and discussion which address the following:

1. Development of a system for electronic transfer of financial aid information.

2. Development of a process for sharing innovative instructional methods and materials.

3. Development of a system for a common assessment of incoming students and for sharing the information accumulated during assessment.

4. Electronic delivery of classes. The exploration should include sharing of faculty and providing courses and programs, especially those listed in Category 3 of the programs and classifications provided in Appendix E, to provide the best possible delivery of programs to students in the metro area and to ensure the maximum use of resources.

IV. Benefits to Students

Students in the Oklahoma City metro area may enroll at one or more institutions (Appendix A). The variety of schedule sequences and time frames enables students to "shop" for courses that will meet their needs in the time frame that is most appropriate at the location that is convenient for their schedule.

Several groups of students benefit because of the number of higher education institutions in the metro area. One group is the students who may not be in the typical fall-spring sequence in a degree program. This variety in programming will allow the student to develop a plan for specialized courses and program completion that fits the student's needs. The availability of courses may enable the student to complete the program without extending the time required for program completion.

Another group of students who benefit because of the educational opportunities in the metro area are individuals who need to enroll in required courses in specialized content areas that may not be taught during a given semester at the institution of initial enrollment. The sharing of class schedules, planned sequencing of courses, and having a similar semester starting date provides the option to enroll in the course(s) at another metro area institution.

Other services provided for students include:

1. Metropolitan two-year colleges include in their course schedule an advertisement identifying other metro area institutions (Appendix J).

2. Students are referred to other metropolitan area campuses when the desired program is not available or classes are full.

3. OCCC and UCO are part of a financial aid consortium for talk-back television students.

4. Learning Resource Centers are available to anyone who wants to use them; students not limited to the LRC at the institution where enrolled.

Recommendations for Expanded Efforts

Continue to share course schedules among metro area institutions. Currently course schedules are shared among metro institutions on an informal basis. The formal adoption of a structured process through which course schedules would be shared has been recommended for implementation beginning with the summer of 1994 session. The process will begin with one distribution of printed schedules with future exploration centering on the utilization of an electronic information system.

Expand ability to advise students regarding each others programs and courses. With the access and availability of course schedules, each institution will have information regarding course offerings. College catalogs are currently shared among the institutions. With an adoption of a common admission form and an electronic linkage, students would very well enroll at multiple institutions through one enrollment procedures based upon their educational career goals.

Expand knowledge of what is in other LRCs and utilization of shared LRC resources. The full implementation of ONENET will allow each metro institution to obtain information regarding each colleges' library holdings using Internet and ORACLE. Enhanced resources are necessary, however, for each institution to gain access to ONENET through formal membership, hardware, and software, This service, along with the existing cooperative efforts of the metropolitan area learning resource directors, provides a structure for the flow of information and sharing of resources. Other means will continue to be explored on an ongoing basis.

V. Market Saturation and Cost of Delivery of Services

To determine the extent of educational services provided by the metro area higher education institutions, an analysis was completed of the number of students served as compared to the population of the primary service areas. A review of the 1990 census data indicates that there are approximately 283,269 individuals between the ages of 15 and 44 living within the Central Oklahoma metro area served by the higher education institutions. Approximately 15,523 of these residents were enrolled during the Fall semester of 1992 in one or more of the metro area institutions.

During the Fall 1993 semester, each institution provided to the Oklahoma State Regents for Higher Education staff the addresses of students enrolled in lower division (1000/2000 level) courses. Using federal census tract data as a basis, an analysis of the enrollment data provided information concerning the higher education market saturation. Appendix K, "Lower Division Enrollments as a Percentage of the Population, ages 14 to 44," reports that Central Oklahoma, predominantly Oklahoma County, is being effectively served by the metro area institutions. This is reinforced when the data are compared to Tulsa County and to the State of Oklahoma.

In addition, the Oklahoma State Regents for Higher Education staff developed maps for each of the study institutions. The maps portray the distribution of students enrolled in the central Oklahoma area institutions. (See Appendix L) These maps suggest that with the possible exception of northeast Oklahoma City, the OKC metro area is being effectively served. Maps of Tulsa County residents served by Tulsa Junior College were also prepared by the State Regents staff to enable a visual comparison with the Oklahoma City institutions (Appendix M).

Utilization of Resources

The metro area institutions are sharing institutional resources to meet student and community needs. Numerous examples of this cooperation within the educational services have been cited throughout this report. In addition, the institutions have collaborated on faculty salary and workload schedules and coordinated televised instruction with the metro area. An additional notable example of the sharing of human resources is the Rose State director of Nursing Education acting as the Nursing Director at Oklahoma City Community College for an extended period in 1988. This action enabled both programs to effectively operate for the period when Oklahoma City Community College was without a permanent director. In an attempt to avoid interruptions in students' academic progress caused by the remodeling of the campus broadcast studio this Spring, Rose State College students and faculty are sharing the Oklahoma City Community College media production and broadcasting studio for class and media production activities.

Because each of the area institutions operate under independent governing boards and administrative staff, the question of efficiency of operation could be raised. An analysis

of operating costs indicates that when considered individually or as a whole, the institutions are very efficient when compared to other state institutions.

Using the Oklahoma State Regents for Higher Education FY 1991-92 cost data included in the "Study of Administrative Costs at Oklahoma Public Universities and Colleges," the operating costs and administrative costs of the Oklahoma City area institutions were determined. The following table summarizes these data and provides for comparison with both system-wide and Tulsa area statistics. These data suggest that comparatively the institutions are managed very efficiently.

FY 1991-92 Expenditures Per Full-time Equivalent Student

	OKC Institutions	Tulsa Jr. College	Two-Year College	Regional Univ.	Compre. Univ.
Total Expenditures/ FTE	$3,393	$3,911	$3,520	$4,343	$7,648
Administrative Cost/FTE	429	522	564	487	760

Summary

The metropolitan Oklahoma City area study for the five public higher education institutions focused on five primary areas: (1) Articulation and Transfer of Courses and Programs, (2) Programs Offered, (3) Existing Collaborative Efforts, (4) Benefits to Students, and (5) Market Saturation and Cost of Delivery of Services. As a result of the analysis, study, and discussion, twenty-one (21) recommendations were formulated to address continued and expanded cooperation and collaboration between and among the five institutions (first attachment). The institutions will be working together to analyze the higher education needs of the area and to provide for the continued delivery of quality programs.

The five metro area higher education institutions involved in this study are providing educational opportunities to a larger percentage of the population age 15 to 44 (5.48%) than the percentage of the State of Oklahoma population ages 25 to 44 being served by higher education (2.69%). These metro area institutions are sharing resources, collaborating in programming and scheduling of courses, and working together to meet the needs of the students and the community. The data collected and analyzed suggests that, although these institutions operate under independent governing boards and administrative staff, these institutions are managed very efficiently and are cost effective when compared to other state institutions.

METRO AREA PUBLIC HIGHER EDUCATION INSTITUTIONS
RECOMMENDATIONS FOR EXPANDED
COOPERATIVE AND COLLABORATIVE EFFORTS

Area	Recommendation	People Involved	Target Data	Related Text Pages or Appendix
Articulation and Transfer	Develop and implement electronic transfer of transcripts among the metro area institutions	MIS, Registrar, Financial Aid	Dependent upon resources and ability for computer communication	
	Develop generic numbering system for transfer curriculum	Departmental representatives	1/3 complete Spring 95 2/3 complete Spring 96 completed Spring 97	Appendix N
	Develop generic numbering system for occupational/technical curriculum	Departmental representatives	20% per year Coordinated with the existing program review process	Appendix N
	Develop and implement standing committee to maintain generic numbering system	Departmental representatives	Begin Fall 97 On-going	
Programs	Increased collaboration between institutions	Departmental representatives	Engineering: In Process Electronics: In Process Modern Language: In process Dates will relate to development of generic numbering system and program reviews	Appendices E&N

Area	Recommendation	People Involved	Target Date	Related Text Pages or Appendix
	Coordinated program reviews for programs in common between/among institutions	Instructional administrators, Departmental representatives	Fall 94 Develop schedule for reviews	Appendix N
	Dialogue between institutions before and during development of new program proposals	Instructional officers	Ongoing	
Expand Existing Collaborative Efforts	Develop compatible academic calendar	Instructional officers, Departmental representatives	Procedures adopted; annual fall activity	
	Expand collaborative efforts when developing course schedules to provide maximum utilization of resources and effective use of resources	MIS, Financial Aid, Personnel	Ongoing activity	
	Continue and expand collaboration/agreements among institutions and implement electronic transfer of information	MIS, Financial Aid, Personnel	Ongoing	
	Expand shared learning resources Electronic sharing of information and resources, e.g. , CD-Roms	Librarians, Media, Personnel,	Dependend upon funding for electronic network	
	Expand shared learning resources: Share information relating to resources in each LRC so faculty can help students understand where in the metro area materials are available	Librarians, Media, Personnel, Faculty	Fall 94 Ongoing	

Area	Recommendation	People Involved	Target Date	Related Text Pages or Appendix
	Explore and implement the sharing of faculty through electronic delivery of classes	Instructional officers	Begin Fall 94	Appendix E
	Continue and expand staff development activities	Instructional officers	Ongoing	
	Share innovative teaching methods and materials	Faculty	Ongoing	
	Develop system for common assessment of incoming students and sharing of information	Representative from assessment committee of each institution	Implement Fall 94 Ongoing	
Benefits to Students	Share schedules among metro area institutions Explore electronic sharing of schedules	Those who advise students, MIS, Registrar	Each semester or session	
	Expand ability to advise students regarding each other's programs/courses	Those who advise students	Ongoing	
	Expand knowledge of what is in other LRC's and utilization of shared LRC resources	Library, Directors, Faculty	Ongoing	
Market Analysis and Cost of Delivery of Services	Market analysis of geographic areas that appear to not be as well served as other areas and develop appropriate programming	Institutional Research, Presidents, Instructional officers	Develop Plan Spring 95; Implement sometime after Spring 95	Appendices K&L
	Focus resources to increase quality and delivery of programs	Administrators, Departmental representatives	Ongoing	

LOWER-DIVISION OFFERINGS IN THE OKLAHOMA CITY METROPOLITAN AREA

Key to Location of Explanatory Text Regarding Each Recommendation

Recommendations		Location of Part II Explanation
1.	Develop and implement electronic transfer of transcripts among the metro area institutions.	See Part II, top of page 4.
2.	Develop generic numbering system for transfer curriculum.	See Part II, page 5, "Generic Course Numbering."
3.	Develop generic numbering system for occupational/technical curriculum.	See Part II, page 5.
4.	Develop and implement standing committee to maintain generic numbering system.	See Part II, page 5.
5.	Increase collaboration between institutions (particularly in engineering, electronics, and modern languages).	See Part II, page 6, items 2 and 9; also page 7, para. 4.
6.	Coordinate program reviews for programs in common between/among institutions.	See Part II, pages 7-8, items 1-3; also page 7, para. 6.
7.	Commence dialogue between institutions before and during development of new program proposals.	See Part II, pages 6-8.
8.	Develop compatible academic calendar.	See Part II, bottom of page 8, paragraph entitled "Calendaring and scheduling."
9.	Expand collaborative efforts when developing course schedules to provide maximum utilization of resources and effective use of resources.	See Part II, bottom of page 8 (same as Recommendation 8); also page 9, para. 5.
10.	Continue and expand collaboration/agreements among institutions and implement electronic transfer of information.	See Part II, page 10; also page 5, para. 1; and page 11, items. 1 and 3 under "Other Areas."
11.	Expand shared learning resources.	See Part II, top of page 11, "Learning resources."
12.	Expand shared learning resources: Share information relating to resources in each LRC so faculty can help students understand where in the metro area materials are available.	See Part II, top of page 11, "Learning resources."
13.	Explore and implement the sharing of faculty through electronic delivery of classes.	See Part II, page 11, middle of the page, "4. Electronic delivery of classes."

Recommendations		Location of Part II Explanation
14.	Continue and expand staff development activities.	See Part II, page 11, third paragraph, "Staff development."
15.	Share innovative teaching methods and materials.	See Part II, page 11, item 2 under "Other Areas"; also page 12, last paragraph.
16.	Develop system for common assessment of incoming students and sharing of information.	See Part II, page 11, middle of page, "Other Areas," item 3.
17.	Share schedules among metro area institutions and explore electronic sharing of schedules.	See Part II, page 12, middle of the page, "Continue to share course schedules among metro area institutions."
18.	Expand ability to advise students regarding each other's programs/courses.	See Part II, page 12, toward bottom of page, "Expand ability to advise students regarding each others programs and courses."
19.	Expand knowledge of what is in other LRC's and utilization of shared LRC resources.	See Part II, page 12, bottom of page, "Expand knowledge of what is in other LRCs and utilization of shared LRC resources."
20.	Market analysis of geographic areas that appear not to be as well served as other areas and develop appropriate programming.	See Part II, page 14.
21.	Focus resources to increase quality and delivery of programs.	See Part II, page 14.

Industrial Loss Prevention

Training & Development

Program Description

The purpose of this 2+2 program is to afford the Industrial Loss Prevention graduate an opportunity to apply the knowledge and skills acquired in the associate degree to a bachelor's degree in Training and Development. The combination of these two degrees will equip the graduate to pursue opportunities in Industrial Loss Prevention with special emphasis in the design, delivery, and evaluation of training programs.

The ideal structure of a 2+2 program is for the student to complete the associate degree and then complete the bachelor's degree as expeditiously as possible. To accomplish this, the student needs to work closely with his/her advisors and pay particular attention to coursework in both degree programs.

Refer to the appropriate catalogs available from both institutions for a detailed description of both of these degree programs.

Graduation Requirements

To graduate with a bachelor's degree in General Studies with a focus in Training and Development, the student must meet specific requirements. Here are selected minimum graduation requirements of interest to students participating in this 2+2 program:

- Completion of 50 hours of general education
- Completion of 24 hours in residence at University of Central Oklahoma
- Completion of 40 hours of 3000/4000 level courses
- Completion of 60 hours from a senior (4-year) college or university
- Completion of 124 hours for the bachelor's degree
- Completion of at least 10 hours of the major earned in residence.
- Completion of at least 15 hours of the major earned at the 3000/4000 level.

The total hours to graduate with the associate degree in Industrial Loss Prevention is 70 hours. As 60 hours must be earned from a senior college, the student must plan ahead when selecting courses in general education.

B-1

Industrial Loss Prevention + Training and Development

General Education . . . . . 50 hours

As this associate degree is an applied science degree, there are additional general education courses the student must complete to meet the general education requirements of the bachelor's degree. These include:

Humanities	(0-5 hours depending on AAS)
Science	(0-6 hours depending on AAS)
English Comp II	(0-3 hours depending on AAS)

When these courses are built into the student's associate degree program, the general education requirements for the bachelor's degree will be met. If not, then the student will need to complete these courses at the University of Central Oklahoma or another senior level college or university.

Major . . . . . 40 hours

The Training and Development major is a 40-hour block with 16 hours of 3000/4000 level courses and electives. The remaining 24 hours are in the occupational proficiency. The occupational proficiency is the knowledge and skill base the trainer will draw upon to design, deliver, and evaluate training programs. Hours in the major include:

Training and Development Courses	16 hours
Industrial Loss Prevention courses from the associate degree .	24 hours

Professional Development . . . . . 31 hours

The professional development area consists of a 34-hour block (31 hours as Management is taken as part of the associate degree) with 18 hours of required courses and 16 hours of approved electives. It is recommended that the electives be in areas that will assist the student in reaching her/his specific occupational goals. Suggested areas of study include Criminal Justice, Safety Education, Management, Public Administration, Human Resource Management, Municipal Management, and Public Service. The student should take TCHED 4093 (Educational Psychology) as part of the professional development area.

Electives -- Electives to bring the total to 124 hours and meet all graduation requirements. Elective hours may include a Training and Development internship.

Central State University Edmond

Associate in Science Biology

Bachelor of Science Biology

Program Description

The Purpose of this 2 + 2 program is to afford the Associate Science graduate an opportunity to apply the knowledge and skills acquired in the associate degree to a bachelors degree in biology. The combination of these two degrees equip the graduate to pursue opportunities in the life science areas which require a B. S. in Biology. Those interested in professional health related fields may also follow this program.

The ideal structure of a 2 + 2 program is for the student to complete the associate degree and then complete the bachelors degree with as few duplicate or extra courses as possible. To accomplish this, the student needs to work closely with his/her advisors and pay particular attention to course work in both degree programs.

Refer to the appropriate catalogs available from both institutions for a detailed description of of these degree programs.

Graduation Requirements

To graduate with a bachelors degree in Biology at Central State University in the 2 + 2 program, the student must complete the Associate in Science degree program of 62 hours which includes:

- 35 hours of General Education (13 of which are included in the math and science)
- 39 hours in math and science as specified in the Rose State College Catalog

The minimum graduation requirements at Central State University are:

- Completion of 30 hours in residence at Central State University
- Completion of 60 hours from a senior (4-year) college or university
- Completion of 40 hours of 3000/4000 level courses
- Completion of 124 hours for the Bachelors degree
- Completion of at least 10 hours of the biology major earned in residence
- Completion of at least 18 hours of the biology major at the 3000/4000 level

Associate of Science Degree RSC + Biology Major CSU

A Bachelors Degree in Biology at C.S.U. requires completion of a 21 hour core program at the 1000/2000 level. The Core courses are prerequisites for most of the 3000/4000 level biology electives. If the students elects LFSC 2444 Ecology as apart of the Associate Degree in Biological Science, the degree fulfills the requirements of the biology core program at Central State University with the following exceptions:

- BIO 2203 Cell Biology
- BIO 2233 Heredity and Evolution or 3304 Genetics
- CHEM 2303 Organic Chemistry I
- CHEM 2312 Organic Chemistry I Lab.

The Biology Department strongly advises a student complete BIO 2203, Cell Biology, in the first semester at Central State University. Cell Biology is a prerequisite for most 3000/4000 level biology courses. Organic Chemistry I (CHEM 2303 or equivalent) should also be completed as soon as possible.

Bachelor of Science Degree in Biology

Bachelor of Science in Biology	50	hours in major
General Education (fulfilled by A.S.)	38	
Biology Core (mostly fulfilled by A.S)	21	
Organic Chemistry	5	
Elective Biology (no more than 6 hours at the 2000 level)	24	
Electives to bring total to	124	hours

General Physics I and II are recommended electives

FOREIGN LANGUAGE AGREEMENT BETWEEN

OKLAHOMA CITY COMMUNITY COLLEGE AND

ROSE STATE COLLEGE

The parties to this Agreement are Oklahoma City Community College and Rose State College.

To enable the greater Oklahoma City metropolitan area to effectively compete in today's global society its citizenry must have greater opportunity for foreign language proficiency and multi-cultural understanding. The role of community colleges in meeting this need has been documented by the American Association of Community Colleges in 1992 through its "Foreign Language Education Policy Statement" which begins:

> Foreign language education has become a national priority. Leaders from many sectors of American society--federal, state, and local governments, the business and corporate sector, labor and education--insist that foreign language instruction must be an essential part of the education of citizens for today's and tomorrow's increasingly interdependent world. Elected officials, economists, cultural leaders, corporate executives and educators at all levels are concerned about an America whose citizens cannot understand, converse or do business in a multi-linguistic world--a world in which global cooperation and peace depend not only on sound policy, but on effective communication. These leaders recognize that the ability to read, write, speak and comprehend the language of other peoples, as well as the ability to understand both one's own heritage and the culture of other peoples, has the power to transform rivalries and competition into partnerships and cooperation.

The purpose of this Agreement is to provide students of Oklahoma City Community College and Rose State College greater opportunity for the study of foreign languages.

Whereas, the parties believe that educational opportunities in the greater Oklahoma City metropolitan area should be of the highest quality and be delivered to the public in the most effective and efficient manner possible; and

Whereas, the parties desire to enter into a joint effort to provide foreign language instruction which meets the standards of and is in compliance with all policies of Oklahoma City Community College, Rose State College, and the Oklahoma State Regents for Higher Education.

Oklahoma City Community College and Rose State College agree to the following terms and conditions:

1. The Colleges shall cooperatively schedule foreign language classes so as to maximize enrollment opportunity and flexibility and to minimize duplication.

2. Each college shall offer co-listed foreign language classes. For each co-listed class the host college shall provide the instructor, classroom, and other necessary resources. Both colleges shall list the class in their schedules of classes with the course name and number as it appears in the individual catalog and with the instructor, classroom, and building identified by the host college.

3. Each college shall provide advisement and registration for its students for enrollment in co-listed classes. Thus students may enroll at their home college and receive credit from their home college for successful completion of a co-listed foreign language class.

4. Faculty who teach a co-listed class shall meet the applicable requirements for appointment at both colleges and shall hold a faculty appointment for that class at both colleges.

5. Each college shall provide to the other all class rosters, grade sheets, and other necessary records for its students enrolled in a co-listed class.

6. The colleges shall adequately inform faculty teaching co-listed courses of the necessary records associated with students from each college.

7. The colleges shall evaluate on an annual basis the distribution of the co-listed course enrollments and related costs and document the general effectiveness and cost savings attributed to this agreement.

8. The operation and maintenance of this agreement shall be at the responsibility of the Vice President for Instruction at Oklahoma City Community College and the Vice President for Academic Affairs at Rose State College or their designates.

9. This agreement may be modified by written addendum approved by the President of Oklahoma City Community College and the President of Rose State College or their designates.

ARTICULATION 2+2 AGREEMENT BETWEEN

OKLAHOMA CITY COMMUNITY COLLEGE AND

THE UNIVERSITY OF CENTRAL OKLAHOMA

The parties to this Articulation 2+2 Agreement are Oklahoma City Community College and the University of Central Oklahoma.

The purpose of this Articulation 2+2 Agreement is to afford graduates with an Associate in Science degree in Diversified Studies from Oklahoma City Community College the opportunity to apply their knowledge and skills toward a Bachelor of Science in Education Degree - Industrial Technology Education, Technology Education Option from the University of Central Oklahoma. The combination of these two degrees will equip the graduate to pursue a teaching career in technology education.

The ideal structure of an Articulation 2+2 Agreement is for the student to complete the associate degree and then complete the bachelor's degree as expeditiously as possible. To accomplish this, the student must work closely with advisors and correlate coursework in both degree programs. Students must refer to the appropriate catalogs available from both institutions for a detailed description of both of these degree programs.

Whereas, the parties believe that educational opportunities in the Oklahoma City metropolitan area should be of the highest quality and be delivered to the public in the most effective and efficient manner possible; and

Whereas, the parties desire to enter into an Articulation 2+2 Agreement to provide educational programs which are designed to meet the standards of the Oklahoma State Regents for Higher Education for awarding the Associate in Science Degree in Diversified Studies from Oklahoma City Community College; and

Whereas, the parties desire to enter into an Articulation 2+2 Agreement to provide educational programs which are designed to meet standards of the Oklahoma State Regents for Higher Education for awarding a Bachelor of Science in Education Degree - Industrial Technology Education, Technology Education Option from the University of Central Oklahoma; and

Whereas, this Articulation 2+2 Agreement is in compliance with all policies of the Oklahoma State Regents for Higher Education, Oklahoma City Community College and the University of Central Oklahoma.

The parties agree to the following terms and conditions:

1. Both parties shall be responsible for advisement and enrollment of students enrolled or desiring to enroll in the program encompassed by this Articulation 2+2 Agreement.

2. Oklahoma City Community College shall maintain student records and transcripts of credits earned at Oklahoma City Community College. The University of Central Oklahoma shall maintain student records and transcripts of credits earned at the University of Central Oklahoma.

3. Oklahoma City Community College and the University of Central Oklahoma shall each maintain copies of this agreement and all approved modifications of this agreement.

4. Design and modification of the curriculum shall be the mutual responsibility of both Oklahoma City Community College and the University of Central Oklahoma. Oklahoma City Community College shall ensure compliance with the requirements of the Oklahoma State Regents for Higher Education for awarding the Associate in Science Degree in Diversified Studies; the University of Central Oklahoma shall ensure compliance with the requirements of the Oklahoma State Regents for Higher Education for awarding the Bachelor of Science in Education Degree - Industrial Technology Education, Technology Education Option

5. Descriptive materials, such as catalogs, brochures, etc., developed to support the Articulation 2+2 Agreement, shall emphasize the nature of the program and shall identify both parties as partners in delivering quality education to the citizens of Oklahoma. Each party shall be responsible for the cost of producing its own materials.

6. This Articulation 2+2 Agreement applies to the educational program attached hereto.

7. The operation and maintenance of this articulation agreement shall be the mutual responsibility of the Dean of Developmental and Interdivisional Studies at Oklahoma City Community College and the Chair of the Department of Occupational and Technology Education at the University of Central Oklahoma.

8. This Articulation 2+2 Agreement may be modified by written addendum approved by the Vice President for Instruction of Oklahoma City Community College and the Vice President for Academic Affairs of the University of Central Oklahoma or their designated persons.

CONSORTIUM AGREEMENT BETWEEN THE UNIVERSITY OF OKLAHOMA AND OKLAHOMA CITY COMMUNITY COLLEGE

In order to promote opportunities for study abroad, THE UNIVERSITY OF OKLAHOMA (OU) and OKLAHOMA CITY COMMUNITY COLLEGE (OKCCC) join in the following agreement on educational cooperation.

The two institutions of higher education will endeavor to cooperate in study abroad programs in areas of mutual interest. The University of Oklahoma will act as the lead and coordinating institution.

To the extent feasible, both institutions will encourage direct contact and cooperation between OU's Office of International Programs and OKCCC's Office of Arts and Sciences. The following general forms of cooperation will be pursued:

1. Collaboration of faculty and staff to promote Study Abroad Programs. Student participants would enroll as OU students and obtain OU credit which would be transferable to OKCCC.

2. Establishment, initially, of summer language/culture programs in Mexico and France.

3. Investigation of other joint international and intercultural activities.

Themes of joint activities and the conditions for utilizing results achieved and arrangements for specific exchanges and other forms of cooperation will be developed mutually for each specific case.

Both parties understand that all financial arrangements will be negotiated and will depend on the availability of funds.

The Agreement will remain in effect until one party notifies the other of its wish to terminate the Agreement at least one hundred-eighty (180) days prior to the date of termination.

AN ARTICULATION AGREEMENT FOR THE ASSOCIATE OF SCIENCE DEGREE WITH A MAJOR IN PRE-AGRICULTURE

Oklahoma City Community College and El Reno Junior College are committed to addressing the academic needs of students in the most effective and efficient manner possible. This agreement addresses the needs of students residing near Oklahoma City Community College who wish to pursue careers in agriculture.

Our colleges agree to provide an articulated curriculum that allows students to earn credit in general education and support courses at Oklahoma City Community College and earn credit in agriculture related courses at El Reno Junior College. This articulated curriculum will culminate in the Associate of Science degree with a major in Pre-Agriculture conferred by El Reno Junior College. Our colleges further agree to schedule classes so that students may conveniently co-enroll at both institutions while pursuing this curriculum. Students co-enrolled at both institutions while matriculating in this program will pay the appropriate tuition and fees on a course-by-course basis based on the institution presenting each course. Students will have every right to all student services and activities provided on both campuses while co-enrolled.

El Reno Junior College agrees to provide faculty advisement for students who enroll in this cooperative Pre-Agriculture program. Students who have a record of continuous enrollment in this articulated curriculum pattern will be considered as satisfying the residency requirement of El Reno Junior College and eligible for the associate degree providing all other graduation requirements from El Reno Junior College are met.

Oklahoma City Community College agrees to inform students and prospective students of this co-enrollment opportunity through appropriate display of the curriculum pattern in the Oklahoma City Community College Catalog and within other information documents. All such information will clearly indicate that the major courses and the degree are presented by El Reno Junior College. Oklahoma City Community College will also inform students and prospective students of the schedule of major courses available on the El Reno Junior College campus. Oklahoma City Community College agrees to transmit appropriate student records and transcripts for the purpose of transferring credits to El Reno Junior College without charge to the student.

3/18/91

Dr. Bob Gaines
Executive Vice President/Vice President for Instruction
Oklahoma City Community College

3/25/91

Dr. Jenilee Mosier
Vice President for Instructional Services
El Reno Junior College

COMMUNITY
COLLEGE

November 1, 1993

Dr. Delores Meyer
Vice President for Instructional Services
Redlands Community College
P. O. Box 370
El Reno, OK 73036-0370

Dear Dr. Meyer:

Enclosed is a copy of Oklahoma City Community College's teleconference/videoconference schedule for FY 1994, that we discussed during our luncheon. We are extending an invitation to you and your staff to attend any of the conferences. For registration, please call Ms. Robin Cone, Human Resources office, at 682-7542.

If you have questions about the teleconferences/videoconferences, or wish to discuss further cooperative efforts in this area, please call Ms. Charlotte French, Associate Vice President for Instruction - Instructional Support Services and Outreach.

I look forward to continued cooperative activities among our colleges.

Sincerely,

Robert P. Todd, Ed.D.
Vice President for Instruction

MEMORANDUM

TO: All College Employees

FROM: Gary A. Lombard
Director of Human Resources

DATE: August 17, 1993

SUBJECT: Fall 1993 and Spring 1994 Teleconference and Videoconference Series

IC members - OCCC's schedule for teleconferences/videoconferences. RCC welcome to participate. Do we have a similar list? Debora

---

The attached flyer describes the teleconference and videoconference offerings for Fall 1993 and Spring 1994. I encourage your participation. To register, please place a check mark next to the conference in which you are interested, and return this memo to Robin Cone in Human Resources.

FALL 1993 TELECONFERENCES

____A. "Exploring the World of Computer Networks"
Facilitator: Ms. Barbara King, Director of Library Services
September 30, 1993
12:00 p.m. - 2:00 p.m.
Room 3P5, Main Building

____B. "Maximizing Multi-Media"
Facilitator: Dr. Jim DeChenne, Director of Curriculum and Instructional Development
October 6, 1993
2:30 p.m. - 4:00 p.m.
Room 3P5, Main Building

____C. "Trauma: Beyond the Golden Hour"
Facilitator: Mr. Harvey Conner, Coordinator of EMT
October 14, 1993
1:00 p.m. - 3:00 p.m.
Room CU3, Main Building

____D. "Seeds of Conflict: Biodiversity in the Food Supply"
Facilitator: Ms. Brenda Breeding, Professor of Biology
October 15, 1993
11:00 a.m. - 2:00 p.m.
Room 3P5, Main Building

E2

____E. "Deploying New Computer Technology: How to Manage the Change"
Facilitator: Mr. John Richardson, Director of Computer Systems Development
November 10, 1993
12:00 p.m. - 2:00 p.m.
Room 3P5, Main Building

____F. "New Opportunities in Workforce Education"
Facilitator: Ms. Carolyn Goad, Director of Continuing Education
November 17, 1993
1:00 p.m. - 3:00 p.m.
Room 3P5, Main Building

____G. "Peter Senge: Understanding Learning Organizations"
Facilitator: Dr. Robert Todd, Vice President for Instruction
December 10, 1993
12:00 p.m. - 3:00 p.m.
Room 3P5, Main Building

____H. "Technical Update for Financial Aid Administrators"
Facilitator: Ms. Marion Paden, Vice President for Student Services
December 14, 1993
12:00 p.m. - 2:00 p.m.
Room 3P5, Main Building

.....

SPRING 1994 TELECONFERENCES

____I. "Solving Local and Wide Area Network Challenges"
Facilitator: Mr. Elwyn Hastings, Director of Information Processing Services
February 10, 1994
12:00 p.m. - 2:00 p.m.
Room 2N5, Main Building

____J. "A New Era of Discovery"
Facilitator: Mr. Gary Houlette, Professor of Physical Science
February 17, 1994
12:00 p.m. - 2:00 p.m.
Room 2N5, Main Building

____K. "WAC: How Schools and Colleges Collaborate"
Facilitator: Ms. Nirmala Varmha, Professor of Composition and Literature
February 24, 1994
12:00 p.m. - 3:00 p.m.
Room 2N5, Main Building

E3

____L. "Model Partnerships in Workforce Education"
Facilitator: Ms. Carolyn Goad, Director of Continuing Education
March 3, 1994
1:00 p.m. - 3:00 p.m.
Room 2N5, Main Building

____M. "Information Technology: Bandwidth and Public Policy:
The Data Highway Debate and Its' Impact on Businesses"
Facilitator: Mr. Elwyn Hastings, Director of Information
Processing Services
April 14, 1994
12:00 p.m. - 2:00 p.m.
Room 2N5, Main Building

TELECONFERENCE/VIDEOCONFERENCE DESCRIPTIONS

Exploring the World of Computer Networks
This videoconference will explore the uses of computer networks and sample the vast array of resources available via the Internet, the global educational and research network. During the broadcast, you can participate in a dialogue with a panel of experts in computer networking. You will also learn more about network, communication, and navigation tools such as e-mail, FTP (file transfer protocol), Telnet, CWIS (campus wide information system), WAIS (wide area information server), Gopher, and more.

Maximizing Multi-Media
Faculty and administrators who participate in this videoconference will receive information from both education and computer experts on how to incorporate multi-media in instructional design and classroom management.

Trauma: Beyond the Golden Hour
Trauma is the leading cause of death in people between the ages of one and forty-five. This videoconference will feature a panel of experts who will highlight the current standards and research in trauma care. Special considerations for children and the elderly, as well as the ethical, clinical, and political issues will be incorporated into a multi-disciplinary approach to trauma care.

Seeds of Conflict: Biodiversity in the Food Supply
The program provides students and other interested individuals with the latest information about hunger and aid programs throughout the world. This year, an expert group of panelists will discuss how the safety of the global food supplies in the 21st century will depend on how quickly and forcefully governments and the international community act to preserve and protect the world's plant genetic resource base.

Deploying New Computer Technology: How to Manage the Change
This provides computer professionals with information on how to introduce new technologies in their organizations. The program features a panel of information systems professionals and their clients discussing organizational dynamics. You will learn about the deployment, training, and cultural issues that computer professionals must contend with when introducing new client-server applications such as electronic mail, imaging, automated workflow, multi-media, and database servers. A must for anyone engaged in introducing new technology into their work environment.

New Opportunities in Workforce Education

This videoconference will discuss key issues related to workforce education in roles that various sectors can plan to produce a better educated and better trained workforce.

Peter Senge: Understanding Learning Organizations

This teleconference will explain the basics of learning organizations and their five disciplines. The program will feature an overview by Senge, with examples of individuals and organizations that have adopted the learning organization approach, followed by a question and answer dialogue with the satellite audience.

Technical Update for Financial Aid Administrators

Financial administrators, fiscal officers, and admissions personnel will value this videoconference, detailing the most current information on new legislation, regulatory changes, and policy interpretations affecting administrations of the Title IV Student Aid programs. This videoconference will explain higher education's new responsibilities under both of these plans, as well as the modifications institutions will need to make to their current operational systems. The program will also discuss several major regulatory packages coming up in the fall, and how these new rules will impact operations and student eligibility.

Solving Local and Wide Area Network Challenges

This videoconference features the experiences of large and medium size businesses which have successfully integrated client server network applications across their local and wide area network. The program will draw upon the expertise of a panel of information systems professionals who are responsible for defining standards, and sharing performance, maintaining system integrity, recovery planning, and integrating hardware and software technologies. Computer professionals will learn what solutions work in solving local and wide area network challenges. They will also learn about the broader issues involved in managing the dynamic client server telecommunications environment.

A New Era of Discovery

A new era of discovery will open as our nation, in cooperation with international partners, establishes a permanent orbiting laboratory in space. Space Station will provide researchers with unprecedented opportunities and access to the space environment. Space Station is designed to provide a micro gravity environment which will enable research in life sciences, materials, fluid physics, combustion and biotechnology research, and technology development. This videoconference is for those who wish to learn from NASA officials about opportunities for research.

WAC: How Schools and Colleges Collaborate

This videoconference focuses on issues in writing across the curriculum shared by both school teachers and college professors. The program will explore ways for these educators to work collaboratively in disciplines to help students write and think more effectively. The videoconference will also feature model collaborative programs and projects of national prominence.

Model Partnerships in Workforce Education

This videoconference will provide detailed information on the opportunities that are available for education providers to develop partnerships for workforce education with the corporate sector. The program will feature case-study examples and models of such programs and will provide insights into the special dynamics that exist as the educational culture and the workplace culture learn to work together.

Information Technology: Bandwidth and Public Policy: The Data Highway Debate and Its' Impact on Businesses

This videoconference explores how the worldwide telecommunications infrastructure is rapidly changing. Computer and other technology professionals will learn the advantages and breadth of new infrastructure technologies being deployed by public and private carriers. The program will also discuss what effect public policy has on communication providers and consumers and will feature leading experts debating the future opportunity and commercialization of the "data highway" as they share their insight, opinions and visions for the future.

ROSE STATE COLLEGE

Interoffice Communication

TO: Oklahoma State University - Oklahoma City

FROM: Annette Lopp, Director, Institutional Research and Assessment

DATE: Thursday, September 23, 1993

SUBJECT: "Assessing Student Outcomes: Successful Practices and Procedures" Teleconference

We are delighted that you have decided to participate in the presentation of "Assessing Student Outcomes: Successful Practices and Procedures" Teleconference on Thursday, September 30th. We will be meeting in the Rose State College Learning Resources Center, rooms 109 and 110, at 11:30 am for a short meeting and then we will walk directly across to the Lecture Hall for the Teleconference.

The following is a list of those we have registered to attend from OSU - OKC. If any names are misspelled or if any of the titles are incorrect, please call and let us know at (405) 736-0356 by Monday, September 27, 1993.

Mark Ames - Director, Counseling and Assessment
Joni Bice - Department Head, Interpreter Training
Don Connel - Division Head, General Studies
Dee Frassetto - Assistant Professor, Humanities
Jerrilee Mosier - Vice Provost for Academic Affairs
Brad Palmer - Instructional Coordinator
DeAnne Parrott - Professor, Nursing
Darrel Tiller - Division Head, Human Services
Elaine Wood - Assistant Professor, Nursing

Don Welch
Carla Splaingard
Evelyn Wilson

There will be a break at approximately 1:15 pm. We will be serving light refreshments which include, coffee, tea, juice, fruit, cheese, crackers, and cookies.

We look forward to seeing you at 11:30 am, Thursday, September 30, 1993.

ABL/dcc

ROSE STATE COLLEGE
PRESENTS
"Assessing Student Outcomes: Successful Practices and Procedures"
for Technical and Community Colleges
by American College Testing and Kirkwood Satellite Services

Who should attend and participate?

Faculty and staff on self-study, core curricular, and institutional effectiveness committees
Presidents, Vice Presidents, Deans
Chairs/Directors, Instruction and Staff Development
Institutional Researchers
Those responsible for assessment and documenting student achievement outcomes

What will you learn?

Participants will learn how to:
design appropriate research, collect data, apply results to decision-making
apply assessment data to program review, teaching, learning enhancements, institutional innovations
use data to meet accreditation and other reporting requirements
use the results to improve student success

When does this live, interactive program take place and how do you register to attend?

Part I will be September 30, 1993 and Part II will be October 14, 1993. THURSDAY
Both presentations will be in the Rose State College Learning Resources Center from 12:00 p.m. to 2:30 p.m.
Call the Office of Institutional Research and Assessment at 733-7311, ext. 7758 or 736-0356 for information and registration.
Handouts will be available before the satellite transmission.

E9

ROSE STATE COLLEGE PRESENTS
American College Testing and Kirkwood Satellite Services on
"ASSESSING STUDENT OUTCOMES: SUCCESSFUL PRACTICES AND PROCEDURES"
A Staff Development Program for Technical and Community Colleges
Part I - September 30, 1993
Part II - October 14, 1993

Purpose: Assessing student outcomes through successful practices and procedures

Who should participate:
•Faculty and staff on self-study, core curricular, and institutional effectiveness committees
•Presidents, Vice Presidents, Deans
•Chairs/Directors, Instruction and Staff Development
•Institutional Researchers
•Those responsible for assessment and documenting student achievement outcomes.

Why you should attend:
Assessing student outcomes is critical to institutional efforts to improve student success as well as meet accreditation and accountability requirements. Good practices in assessing student outcomes can result in improved programs and services which will positively affect retention, student learning, and student success.This first-ever video conference on assessing student outcomes at community colleges' topics are:
•Planning or reviewing plans for outcomes assessment efforts
•Searching for approaches that can reflect the college curriculum and goals, while addressing both cognitive and noncognitive issues;
•Developing assessment procedures that will adequately motivate student participation;
•Seeking to improve the quality of institutional programs, and to improve student services.

What you will learn:
Two models of institutional effectiveness research will be highlighted: Midlands Technical College and Columbus State Community College. The ideas, efforts, and experiences shared by these model institutions will shed light on some of the most pressing challenges confronting community and technical colleges as they seek to demonstrate student growth and development. Participants will learn how:
•to design appropriate research, collect data, apply results to decision-making;
•to apply assessment data to program review, teaching, learning enhancements, institutional innovations.
•to use data to meet accreditation and other reporting requirements; and
•to use the results to improve student success.

Session leaders and content
Moderator: **Mike Rooney** is the District Director of Student Development Services, Maricopa County Community College District Office. He co-chaired the League for Innovation project on "Assessing Institutional Effectiveness in the Two-Year College." Currently he is directing the district-wide assessment of Student Development Services and serves on the District Task Force addressing institutional outcomes.

Midlands Technical College: Coordinated by **Sandi Oliver**, Dean of Student Entry/Enrollment Services, President Hudgins and selected faculty and staff will share why student assessment has been successful at MTC. Emphasis will be placed on providing key steps to assessment planning, obtaining involvement, key roles, data collection and communication of results.

BEST COPY AVAILABLE
E10

Three examples will be shared that illustrate the use of data for improvement of student success and college effectiveness: 1) success of targeted student subpopulations (academically underprepared and minority students); 2) academic program improvement (math); and 3) improvement of college services and administrative processes (enrollment, registration, financial aid).

Columbus State Community College: Kevin May, Assistant to the Vice President for Academic Affairs, will facilitate the contributions from Shirley Palumbo, Vice President for Academic Affairs, and staff representatives from Technology, AA/AS Transfer program, and General Education. They will explain CSCC's assessment model and processes; identify strategies for determining and assessing student outcomes; clarify general education philosophy and outcomes; and provide characteristics of effective programs. Special attention will be given to CSCC's outcomes matrix and the value-addedness objectives. Utilization of assessment tools and resources for the improvement of the teaching-learning process will be addressed along with the linkage between assessment and the teaching-learning process.

American College Testing: David Lutz, Director, College Level Assessment and Survey Services, and John Roth, Director of ASSET and Placement Services, will demonstrate research design requirements, the required data collection and illustrate the application of data generated information to decision-making.

How to participate during presentation: Participants are strongly encouraged to phone or FAX their questions at any time during the program. Handouts will be available before the satellite transmission

Oklahoma City, OK 73107

Dear Dr. Mosier:

I am writing this letter as a follow up to our telephone conversation of January 7, 1993. I want to describe for you a recent cooperative activity with Oklahoma City Community College nursing faculty.

In mid-December, 1993, Dr. Salmeron was approached by OCCC nursing faculty asking if they could visit our campus to view the computer facilities used in teaching nursing students. Dr. Salmeron referred the call to me. Dr. Anita Jones, OCCC nursing department head and I talked in some depth concerning the needs of the OCCC faculty. I agreed to present a computer workshop for their faculty development day, January 6, 1994. I met with ten nursing faculty and Dr. Jones in the afternoon of January 6. Sue Klingler also assisted with the workshop by doing a brief presentation on use of the liquid crystal display pad with computer for classroom instruction.

I demonstrated our computer lab and various programs being used in the lab, described our computer testing program, accessed the FITNE electronic bulletin board, and demonstrated all of our interactive video disc programs. OCCC faculty had numerous questions about software and hardware in use at OSU-OKC for the purpose of teaching nursing students. They were provided with information to assist them in making meaningful purchase decisions for computer hardware and software for their program.

Collegiality was very high during this afternoon's activity. This is just one example of the strong feeling of support and willingness to share information between our two programs.

Sincerely,

DeAnne Parrott
Associate Department Head/Computer Coordinator
